

## Migrant Workers and Urban Housing

This editorial is based on <u>"A Shelter In Pandemic"</u> which was published in Indian Express on 10/01/2022. It talks about the housing related issues of the migrant workers which is further aggravated by the Covid-19 Pandemic.

**For Prelims:** Migrant Workers, Urbanisation, Smart Cities Mission, AMRUT Mission, Affordable Rental Housing Complexes (ARHC) for Urban Poor, Swachh Bharat Abhiyan, International Labour Organisation (ILO), Census of India.

**For Mains:** Issues faced by migrant workers, Affordable housing - a major challenge for good urbanisation, Urban housing and related issues of migrant workers.

<u>Urbanisation</u> and the growth of cities in India have been accompanied by **pressure on basic infrastructure and services like housing,** sanitation and health. The worst sufferers of unavailability of these basic needs are the <u>migrant workers.</u>

The <u>Covid-19 pandemic</u> has further aggravated the poor housing conditions of the urban poors/ migrant workers.

All these challenges point directly to the need of a sound policy framework that must also be viewed from the lens of human rights, property rights and socio-economic development.

These policy initiatives must be **in sync with the** <u>Sustainable Development Goal</u> **(SDG) 8.8** which stands for providing a safe and secure working environment for all workers, particularly migrants.

## **Urban Housing and Migrant Workers**

- Homeless Urban Families: The 2011 <u>Census of India</u> reveals that the urban population of the country stood at 31.16% where there are about 4.5 lakh homeless families and a total population of 17.73 lakh is living without any roof over their heads.
  - Maharashtra and Uttar Pradesh are the two states with an acute housing crisis.
- Migrants and Urban Housing: A vast majority of urban population, especially migrants, live under conditions of poor shelter and in highly congested spaces.
  - In India, more than half of the urban households occupy a single room, with an average occupancy per room of 4.4 persons.
  - In the case of migrants working in small units, hotels and homes, their workplace is also their place of lodging.
    - Such places are often unhygienic and poorly ventilated.
  - Most construction workers stay in makeshift arrangements. Casual workers sleep under bridges and on pavements, often living as a group in unhygienic surroundings.
- Impact of Pandemic on Migrants' Housing: Due to the pandemic induced nationwide

**lockdown**, most workers rushed back home leaving behind their temporary abodes and those **who were left behind lost their shelter** because workplaces were shut.

- Migrants who lived in rented apartments could not maintain social distancing.
- In suburban regions with a sizable number of migrants, the local population **insisted on them to vacate houses** citing the unhygienic conditions in the dwellings.
- Even though most state governments appealed to house owners to waive two months' rent, the migrant workers continued to face pressures for paying the rent.
- Initiatives for Urban Housing:
  - Smart Cities Mission: The <u>Smart Cities Mission</u> identified 100 cities, covering 21% of India's urban population, for a transformation in four rounds starting January 2016.
    - Some of the core infrastructure elements in a smart city include proper water supply, assured electricity supply, sanitation, and affordable housing especially for the poor.
  - AMRUT Mission: Efforts like the <u>Atal Mission for Rejuvenation and Urban</u> <u>Transformation (AMRUT)</u> launched in 2005 are intended to make the process of urbanisation smooth.
    - It aimed to ensure that every household has access to a tap with the assured supply of water and a sewerage connection.
    - The mission has now entered its second phase to make cities water-secure and provide better amenities for the marginalised.
  - ARHCs Envisaged in Atma Nirbhar Bharat Package: The Rs 20 lakh crore <u>Atma Nirbhar Bharat package</u> announced by the government in May 2020 included the provision of <u>Affordable Rental Housing Complexes (ARHC)</u> for migrant workers/urban poor.
    - The plan was to convert government-funded housing in the cities into ARHCs
       through Public-Private Partnerships, and provide incentives to various stakeholders
       to develop ARHCs on their private land and operate them.

## **Issues in Affordable Housing for Migrants**

- Ineffective Implementation of Housing Schemes: The Government data shows that 49% of 5,196 projects of the Smart Cities Mission for which work orders were issued across 100 smart cities in India remain unfinished.
  - This lag in implementation raises questions about the efficacy of innovative policy prescriptions.
- Absence of WASH Facilities: According to a 2020 <u>International Labour Organisation (ILO)</u> report on internal labour migrants, the absence of dignified housing is aggravated by a **lack of** adequate <u>water</u>, <u>sanitation and hygiene (WASH) facilities</u>.
- Inadequate Public Toilets: Even though there has been an installation of public toilets through <u>Swachh Bharat Abhiyan</u>, their availability is not adequate in migrant-dense clusters.
- Sudden Increase in Rents: Migrant workers find housing in slums, which is often subject to a sudden increase in rent, and have access only to the poorest infrastructure and services.

## **Way Forward**

- Policymaking For Housing Sector: The existing housing conditions indicate the necessity of coordinated efforts of the state and the contractors to address housing issues. It calls for long-term policymaking and analysis of the housing sector along with necessitating more transparency in the case of contracts.
  - Instead of an extreme condition where the owner suddenly increases a rent, the state can look into the matter to ensure an optimal condition where the rent evolves for a competitive market for houses.
- Reducing Owner-Tenant Conflicts: While developing social rental housing, the state should ensure that the location has proper access to transport networks, education and healthcare.
  - The working group by <u>NITI Aayog</u> constituted to study internal labour has recommended that rental housing in the public sector could be expanded through the provision of dormitory accommodation.

- This would make public housing affordable and reduce the conflict between owners and tenants.
- Action-oriented policies alone can improve the lives of labouring migrants.
- Redeveloping Small and Medium Cities: There is no denying that even our non-megacities
  have inadequate planning, non-scalable infrastructure, unaffordable housing, and poor public
  transport.
  - In order to ensure <u>good urbanisation</u>, it is important to equally focus on the small and medium cities and address the issues of inadequate housing and lack of basic facilities in these cities too.
