

Misuse of Prevention of Money Laundering Act

For Prelims: Supreme Court, Money Laundering, Prevention of Money Laundering Act, Enforcement Directorate, Enforcement Case Information Report, Foreign Exchange Management Act.

For Mains: Money Laundering, Challenges to Internal Security Through Communication Networks, Significance and issues with the Prevention of Money Laundering Act 2002 (PMLA), Foreign Exchange Management Act.

Why in News

The [Supreme Court \(SC\)](#) is examining allegations of rampant misuse of [Prevention of Money Laundering Act 2002 \(PMLA\)](#) by the government and the [Enforcement Directorate \(ED\)](#).

What are the Major Allegations?

- **Being Used for Ordinary Crimes:**
 - PMLA is **pulled into the investigation of even “ordinary” crimes** and assets of genuine victims have been attached.
 - PMLA was enacted in response to India’s global commitment (including the Vienna Convention) to combat the menace of money laundering. Instead, **rights have been “cribbed, cabined and confined”**.
 - PMLA was a **comprehensive penal statute to counter the threat of money laundering**, specifically stemming from trade in narcotics.
 - Currently, the **offences in the schedule of the Act are extremely overbroad**, and in several cases, have absolutely no relation to either narcotics or organised crime.
- **Lack of Transparency and Clarity:**
 - Even the **Enforcement Case Information Report (ECIR)** - an equivalent of the FIR - is considered an “internal document” and **not given to the accused**.
 - The **ED treats itself as an exception to these principles and practises [of criminal procedure law]** and chooses to register an ECIR on its own whims and fancies on its own file.
 - There is also a **lack of clarity about ED’s selection of cases to investigate**. The initiation of an investigation by the ED has consequences which have the potential of curtailing the liberty of an individual.

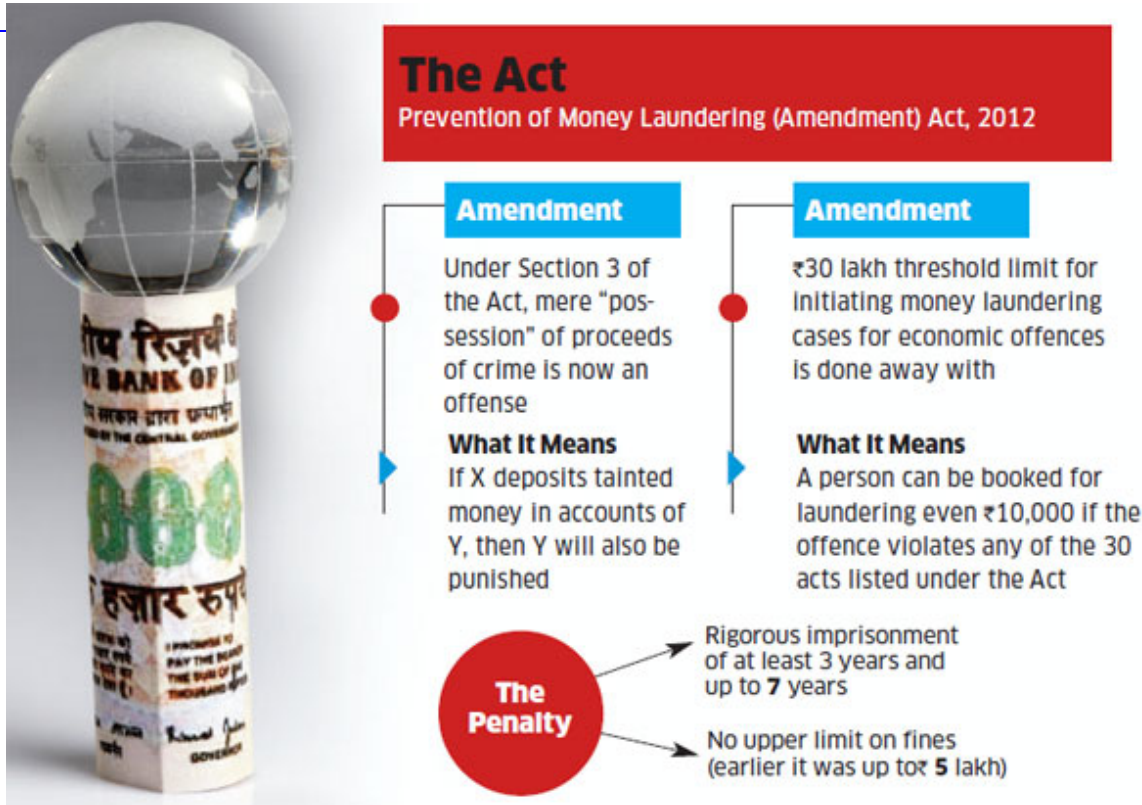

What is the Prevention of Money Laundering Act?

- It forms the core of the legal framework put in place by India to combat Money Laundering.
- The provisions of this act are applicable to all financial institutions, banks (Including RBI), mutual funds, insurance companies, and their financial intermediaries.
- **PMLA (Amendment) Act, 2012:**
 - Adds the concept of ‘reporting entity’ which would include a banking company, financial institution, intermediary etc.
 - [PMLA, 2002](#) levied a fine up to Rs 5 lakh, but the amendment act has removed this upper

limit.

- It has provided for provisional attachment and confiscation of property of any person involved in such activities.

//

What is Money Laundering?

▪ About:

- Money laundering is the **process of making large amounts of money generated by criminal activity**, such as drug trafficking or terrorist funding, **appear to have come from a legitimate source**.
- **Criminal activities** like illegal arms sales, smuggling, drug trafficking and prostitution rings, insider trading, bribery and computer fraud schemes produce large profits.
- Thereby it **creates the incentive for money launderers to "legitimise" the ill-gotten gains** through money laundering.
- The money generated is called '**dirty money**' and money laundering is the process of conversion of 'dirty money', to make it appear as 'legitimate' money.

▪ Process of Money Laundering:

- Money laundering is a **three-stage process** :
 - **Placement:** The first stage is when the crime money is injected into the formal financial system.
 - **Layering:** In the second stage, money injected into the system is layered and spread over various transactions with a view to obfuscate the tainted origin of the money.
 - **Integration:** In the third and the final stage, money enters the financial system in such a way that original association with the crime is sought to be wiped out and the money can then be used by the offender as clean money.

- **Some of the Common Methods of Money Laundering:**

- Bulk Cash Smuggling, Cash Intensive Businesses, Trade-based laundering, Shell companies and trusts, Round-tripping, Bank Capture, Gambling, Real Estate, Black Salaries, Fictional Loans, Hawala, False invoicing.

What is the Enforcement Directorate?

- Directorate of Enforcement is a **specialised financial investigation agency** under the Department of Revenue, Ministry of Finance..
- On **1st May 1956, an 'Enforcement Unit' was formed**, in the Department of Economic Affairs, for handling Exchange Control Laws violations under **Foreign Exchange Regulation Act, 1947**.
- In the year 1957, this Unit was renamed as 'Enforcement Directorate'.
- ED enforces the following laws:
 - [Foreign Exchange Management Act, 1999 \(FEMA\)](#)
 - Prevention of Money Laundering Act, 2002 (PMLA)

Rice Fortification

For Prelims: Food Fortification and related schemes.

For Mains: Food Fortification and its significance.

What is the Scheme?

- **About:**
 - To address anemia and micro-nutrient deficiency in the country, the Government of India approved this **scheme for a period of 3 years in 2019-20.**
 - Under the Scheme, [FCI \(Food Corporation of India\)](#) has been asked to come up with a comprehensive plan for procurement and distribution of fortified rice in all the Districts of the country under [Integrated Child Development Services \(ICDS\)](#) & [Mid-Day Meal \(MDM\) Scheme](#) from 2021-2022.
 - The mid-day meal scheme is now known as [PM POSHAN.](#)
 - Special focus remains on supplying fortified rice to the 112 specially identified [Aspirational Districts](#) of the country.
- **Objectives the Scheme:**
 - **Distribution of Fortified Rice through Public Distribution System**, to cater 15 Districts in the country - preferably one district per State in the initial phase of Implementation.

 - To evaluate the provision, **coverage and Utilization of Fortified Rice by the target population** as well as the efficiency/effectiveness of the consumption of fortified rice in reducing the targeted micronutrient deficiencies in different age and gender groups.

What is Food Fortification and its Need?

- **Fortification:**
 - Fortification is the **addition of key vitamins and minerals such as iron, iodine, zinc, Vitamin A & D to staple foods such as rice, milk and salt to improve their nutritional content.**
 - These nutrients may or may not have been originally present in the food before processing.
- **Fortification of Rice:**
 - According to the Food Ministry, fortification of rice is **a cost-effective and complementary strategy to increase vitamin and mineral** content in diets.
 - According to FSSAI norms, 1 kg fortified rice will contain iron (28 mg-42.5 mg), folic acid (75-125 microgram) and Vitamin B-12 (0.75-1.25 microgram).
 - In addition, rice may also be fortified with micronutrients, singly or in combination, with zinc, Vitamin A, Vitamin B1, Vitamin B2, Vitamin B3 and Vitamin B6.
- **Need of Fortification:**
 - India has very high levels of malnutrition among women and children. According to the Food Ministry, every second woman in the country is anemic and every third child is stunted.
 - India has **slipped to 101st position in the [Global Hunger Index \(GHI\) 2021](#)** of 116 countries, from its 2020 position of 94th.
 - The deficiency of micronutrients or micronutrient malnutrition, also known as “**hidden hunger**”, is a serious health risk.
 - **Rice is one of India’s staple foods**, consumed by about two-thirds of the population. Per capita rice consumption in India is 6.8 kg per month. Therefore, fortifying rice with micronutrients is an option to supplement the diet of the poor.

What are the Initiatives related to Fortification?

- **FSSAI Regulations:**
 - In October 2016, FSSAI operationalized the Food Safety and Standards (Fortification of Foods) Regulations, 2016 for fortifying staples namely Wheat Flour and Rice (with Iron, Vitamin B12 and Folic Acid), Milk and Edible Oil (with Vitamins A and D) and Double Fortified Salt (with Iodine and Iron) to reduce the high burden of micronutrient malnutrition in India.
- **Nutritional Strategy:**
 - India’s National Nutritional strategy, 2017, had listed food fortification as one of the interventions to address anemia, vitamin A and iodine deficiencies apart from supplementation and dietary diversification.
- **Milk Fortification Project:**
 - The **[Milk Fortification Project](#)** was launched by the National Dairy Development Board (NDDB) in collaboration with the World Bank and Tata Trusts, as a pilot project in 2017.

Koalas as Endangered Species: Australia

Why in News?

Recently, Australia has officially classified koalas as **'endangered'**.

Why classified as Endangered and its Significance?

- **Classification as Endangered:**
 - Australia's Koala population has been on the road to extinction **for over two decades now**. The number of Koalas in NSW (New South Wales) declined by between 33% and 61% since 2001.
 - But despite several demands by animal rights groups and conservationists, the government has been accused of doing little to protect the species. Koalas were classified as "vulnerable" only in 2012.
 - During the catastrophic 2019 bushfires in Australia, now known as the **'Black Summer'**, **an estimated 60,000 koalas were impacted**, with vast swathes of their habitat being blackened and rendered unliveable.
 - Another major threat is the **spread of chlamydia, a sexually transmitted disease** known to cause blindness and cysts in the koalas reproductive tract.
- **Significance:**
 - The Endangered status of the koala means **they and their forest homes should be provided with greater protection under Australia's national environmental law**.

What are the Key Things about Koalas?

- **About:**

- Koala is (*Phascolarctos cinereus*) **an arboreal (lives in trees) marsupial**.

- A marsupial is born **in a very incomplete state**. They are minute, hairless and with hind limbs only partially formed. Around **2/3rd of them live in Australia. The other third live mostly in South America.**
- Instead of the placenta, the mother's milk nourishes the young and allows it to grow and develop.
- They share **a number of characteristics with wombats**, who are their closest living relatives, **including a backward-facing pouch.**
- **Habitat:**
 - The typical habitat for Koalas is **open eucalypt woodlands**, and the leaves of these trees make up most of their diet. In terms of societal behavior, Koalas are asocial animals and **typically emotional bonding is seen only between mothers and dependent offspring.**
 - They are **endemic to Australia.**
 - Due to the low nutrient levels of the Eucalyptus leaves they feed on, the koala can sleep up to 18 hours each day.
- **IUCN status:**
 - Vulnerable
- **Threats:**
 - Habitat destruction, climate change & severe weather (Droughts, extreme temperatures).
