

Dastak Campaign | Uttar Pradesh | 16 Apr 2022

Why In News?

On April 15, 2022, the Uttar Pradesh government launched the Dastak Abhiyan to prevent the spread of water-borne and vector-borne diseases.

Key Points

- The campaign launched with the aim of **keeping the people of Uttar Pradesh safe from various communicable diseases** including Encephalitis, Malaria, Dengue, Filariasis and Chikungunya will continue till April 30.
- Under this campaign, **ASHA** and **Anganwadi workers** have been entrusted with the responsibility of making people aware of various water-borne and mosquito-borne diseases.
- Significantly, Uttar Pradesh, which has constituted the maximum number of monitoring committees in the country (over 60,000), is playing a vital role in the fight against seasonal fever, mosquito and water-borne diseases.
- In addition to this, a weekly **Mukhyamantri Jan-Arogya Mela** has already been started along with a communicable disease control campaign to control the spread of vector-borne diseases.
