

# **Connectivity Projects: India and Southeast Asia**

### Why in News

Recently, at the virtual <u>ASEAN</u> (Association of Southeast Asian Nations) summit on Future of India-ASEAN Connectivity Partnerships, the Indian government underlined the importance of cross-border connectivity between India and Southeast Asian nations.

■ **ASEAN** brings together **ten Southeast Asian states** – Brunei, Cambodia, Indonesia, Laos, Malaysia, Myanmar, the Philippines, Singapore, Thailand and Vietnam – into one organisation.

## **Key Points**

- Connectivity between India and Southeast Asia:
  - India currently is working with ASEAN on multiple connectivity projects, through land, water, and air.
  - Giving substance to ASEAN-India relations through connectivity will **gradually change the geopolitical landscape of this region.**
  - In this context, India has now been actively developing infrastructure in Northeastern India.
    - Bangladesh-China-India-Myanmar (BCIM) Corridor is part of this.
  - These connectivity projects will not only curb existing insurgencies, but also help India's northeastern states to develop their economic potential and integrate with mainland India
  - Further, <u>India-ASEAN Free Trade Agreement (FTA)</u> is central to India's growing engagement with her eastern neighbours.
    - It will enable small and medium-sized enterprises in the border areas to explore new business opportunities.
- Examples of Cross Connectivity Projects:
  - India-Myanmar-Thailand Trilateral Highway:
    - One of the flagship projects for land connectivity between ASEAN and India.
    - Connecting the three countries from Moreh in India to Mae Sot in Thailand to Bagan in Myanmar, was first proposed in 2002.
    - Besides this, the India, Myanmar, and Thailand Motor Vehicles Agreement (IMT MVA) is in the final stage.
      - On realization, this will become the first-ever cross border facilitation agreement between South and Southeast Asia. //

#### Kaladan Multi-Modal Transit Transport Project (KMMTTP):

- To develop connectivity through water, ASEAN and India are working on KMMTTP.
- Initiated by the Indian government in 2008 and is entirely funded by India.
- To seek an alternative route through Myanmar for the transportation of goods to the northeast region of India.
- Connects Kolkata in India to Sittwe and Paletwa in Myanmar by sea and river respectively.
- Alongside this initiative, India has contributed to build a sea link via Sittwe port in Myanmar in order to enable an alternative transit route through Bangladesh.

#### Mekong-India Economic Corridor (MIEC):

- Involves the integration of four Mekong countries Vietnam, Myanmar, Thailand, and Cambodia - along with India, connecting Ho Chi Minh City, Dawei, Bangkok, and Phnom Penh with Chennai.
- The corridor will provide opportunities for the participant countries to develop infrastructure, enhance their economic base with the region, and especially reduce the transit distance between India and ASEAN countries.

#### **Way Forward**

- Extension of Trilateral Highway: The Trilateral Highway can be extended to Cambodia, Laos and Vietnam. This will enable greater connectivity and economic integration of India's northeast with its eastern neighbours.
- **Digital Highway:** As such beyond movement of goods and physical connectivity, it is also important for two regions to explore ways to enhance digital connectivity.

- This is in concurrence with the Government of India efforts to turn India into a Global Data
- Improving Maritime Connectivity: With the introduction of the <u>"Sagarmala" project</u>, India plans to invest in port infrastructure for improved integration and connectivity through the sea. This is an encouraging step towards enhancing India-ASEAN Connectivity projects.
