

National Al Portal

For Prelims: National Al Portal

For Mains: Artificial Intelligence, IT and Computers

Why in News?

Recently, the second-year anniversary of **National Al Portal** was celebrated on 30th May, 2022.

What is the National Al Portal?

About:

Launched in 2020, it is a joint initiative by the Ministry of Electronics and IT (MeitY),
 National e-Governance Division (NeGD) and NASSCOM (National Association of Software and Services Companies).

Objectives:

 The portal focuses on creating and nurturing a unified AI ecosystem in the country to drive excellence and leadership in knowledge creation to develop an AI-ready robust workforce for the future and use AI to foster economic growth.

Significance:

 Over the past two years, the portal has played a crucial role in evangelising and nurturing the AI ecosystem through numerous impactful initiatives such as the lab2market, Women in AI Roundtable, AI patent report, Responsible AI handbook for startups, Responsible AI Startups survey, podcasts, and the AI Standards.

What is Artificial Intelligence?

About:

- It describes the **action of machines accomplishing tasks** that have historically required human intelligence.
- It includes technologies like machine learning, pattern recognition, big data, neural networks, self algorithms etc.
- Al involves complex things such as feeding a particular data into the machine and making it react as per the different situations.
- Al is being **used across different industries** including finance and healthcare.
- As per a report by PwC, India reported <u>a 45% increase in the use of AI</u>, the highest among all countries, following the outbreak of the virus.

Barriers to Adoption of AI:

- **Limited understanding of AI:** Many Indian companies may have not yet understood the full benefits of leveraging AI in their companies.
- Low Investments and Less Evolved Startup Ecosystem: Startup/investment funding ecosystem in India is yet to scale up in terms of AI startups and service providers.
- Limited Availability of Al Trained Talent: There is limited infrastructure to 'democratise' and scale-up important Al skills such as deep learning and neural networks.

- Recent Examples of Use of AI in India:
 - For the Covid-19 Response: An <u>Al-enabled Chatbot</u> was used by MyGov for ensuring communications.
 - In Judicial System: An Al based_portal 'SUPACE' is aimed at assisting judges with legal research.
 - In Agriculture: ICRISAT has developed an Al-power sowing app, which utilises weather
 models and data on local crop yield and rainfall to more accurately predict and advise local
 farmers on when they should plant their seeds.
 - In Disaster Management: An Al-based flood forecasting model that has been implemented in Bihar is now being expanded to cover the whole of India to ensure that around 200 million people get alerts and warnings 48 hours earlier about impending floods.
 - In Banking & Financial Services Industry: Few banks in India have adopted Al to increase digitisation to improve customer experience and use algorithms in risk management (for example, fraud detection).

Initiatives Taken to Boost Use of Al:

- The <u>National Strategy for Artificial Intelligence</u> (NITI Aayog, June 2018) which is focused on inclusive AI (AI for all), and the <u>New Education Policy</u> (NEP, 2020) which addresses the need to inculcate AI in the curriculum are the right strategic steps to encourage core and applied research.
- The Ministry of Tribal Affairs (MTA) has inked a MoU with Microsoft to support the <u>digital transformation of schools</u> such as Eklavya Model Residential Schools (EMRS) and Ashram Schools, among others under the Ministry.
- **US India Artificial Intelligence (USIAI) initiative** has been launched to scale up the science and technology relationship between India and the United States.
- In 2020, India joined the 'Global Partnership on Artificial Intelligence (GPAI)' as a
 founding member to support the responsible and human-centric development and use of
 Al.
- <u>'RAISE 2020 Responsible AI for Social Empowerment 2020'</u>, a mega virtual summit, was jointly organised by the NITI Aayog and the MeitY.
- The larger aim of the program <u>"Responsible Al for Youth"</u> is to provide an equal opportunity to all Indian youths in urban, rural and remote corners of India to become human-centric designers who can create real Al solutions to solve economic and social impact issues of India.

Way Forward

- Global Lessons: Countries like China, USA and Israel currently lead the way in terms of Al
 adoption. India can consider a few learnings from these countries to further scale-up its Al
 ecosystem while keeping in mind the overall social development and inclusiveness agenda.
- Clear Central Strategy and Policy Framework: All adoption in India can be accelerated through the formulation of more focused policies related to innovation, for example, patent control and security. Malicious use of All should be managed as well.
- Collaboration among Government, Corporates and Academia: These three critical stakeholders need to work synergistically to undertake actions like nurturing entrepreneurship, promoting re-skilling, encouraging research and development, and driving the policies on the ground.
