

MSP Raised for Kharif Crops

Why in News

Recently, the <u>Cabinet Committee on Economic Affairs</u> has marginally increased the **Minimum Support Price (MSP)** of more than a dozen crops for Kharif Marketing Season (KMS) 2020-21.

Key Points

- The MSP has been raised in the range of 2%-7.5% for the kharif crops based on the recommendation of the **Commission for Agricultural Costs and Prices (CACP).**
- The increase in MSP is in line with the Union Budget 2018-19 announcement of fixing the MSPs at a level of at least 1.5 times of the all-India weighted average cost of production, aiming at reasonably fair remuneration for the farmers.
- **Issue:** This rise will not make much of a difference to farmers, unless there is large scale government procurement in most crops at MSP.
- **Kharif crops:** They are the crops which are grown during the monsoon or rainy season from June to October. **Examples:** Paddy, Cotton, etc.

Minimum Support Price

- The MSP is the rate at which the government buys grains from farmers.
- Reason behind the idea of MSP is to counter price volatility of agricultural commodities due to the factors like variation in their supply, lack of market integration and information asymmetry.
- Fixation of MSP: The MSP is fixed on the recommendations of the Commission for Agricultural Costs and Prices (CACP).
- Factors taken into consideration for fixing MSP include:
 - Demand and supply,
 - Cost of production (A2 + FL method),
 - Price trends in the market, both domestic and international,
 - Inter-crop price parity,
 - Terms of trade between agriculture and non-agriculture,
 - A minimum of 50% as the margin over cost of production, and
 - Likely implications of MSP on consumers of that product.
- The Commission also makes visits to states for on-the-spot assessment of the various constraints that farmers face in marketing their produce, or even raising the productivity levels of their crops.
- Based on all these inputs, the Commission then finalizes its recommendations/reports, which are then submitted to the government.
- The government, in turn, circulates the CACP reports to state governments and concerned Central Ministries for their comments.
- After receiving the feed-back from them, the Cabinet Committee on Economic Affairs (CCEA)
 of the Union government takes a final decision on the level of MSPs and other
 recommendations made by the CACP.
- **Procurement:** The **Food Corporation of India (FCI)**, the nodal central agency of the Government of India, along with other State Agencies undertakes procurement of crops.

- MSP Calculation: This MSP is usually estimated based on three types of calculation methods.
 - **A2:** Under this, MSP is set 50% higher than the amount farmers spend on farming including spending on seeds, fertilisers, pesticides, and labour.
 - **A2+FL:** It includes A2 plus an assigned value of unpaid family labour.
 - **C2:** Under C2, the estimated land rent and the cost of interest on the money taken for farming are added on top of A2+FL.
- The Central government had set up the National Commission on Farmers (NCF) in 2004 to address the issues of farmers in India including that of calculation of MSP.

National Commission on Farmers: Swaminathan Committee

- On 18th November, 2004, the Union government constituted this committee with MS
 Swaminathan as its chairman.
- The main aim of the committee was to come up with a sustainable farming system, make farm commodities cost-competitive and more profitable.
- The commission, in 2006, recommended that MSPs must be at least 50% more than the cost of production and recommended the C2 method for MSP calculation.
- However, the government calculates its MSP based on the A2+FL method.

Commission for Agricultural Costs and Prices

- The CACP is an attached office of the Ministry of Agriculture and Farmers Welfare, formed in 1965. It is a statutory body.
- Currently, the Commission comprises a Chairman, Member Secretary, one Member (Official) and two Members (Non-Official).
 - The non-official members are representatives of the farming community and usually have an active association with the farming community.
- It is mandated to recommend **Minimum Support Prices (MSPs)** to incentivize the cultivators to adopt modern technology, and raise productivity and overall grain production.
- CACP submits separate reports recommending prices for Kharif and Rabi seasons.
