 - It will ensure minimum use of Diclofenac and prevent the poisoning of the principal food of vultures, the cattle carcasses.
 - The Vulture Safe Zone programme is being implemented at eight different places in the country where there were extant populations of vultures, including two in Uttar Pradesh.
 - To upscaling conservation **four rescue centres will be opened** like Pinjore in the north, Bhopal in central India, Guwahati in Northeast and Hyderabad in South India.
 - The ministry has now also launched **conservation plans for the red-headed and Egyptian vultures**, with breeding programmes for both.
- To study the cause of deaths of vultures in India, a **Vulture Care Centre (VCC)** was set up at Pinjore, Haryana in 2001.
- Later in 2004, the VCC was upgraded to being the first **Vulture Conservation and Breeding Centre (VCBC)** in India.
 - At present, there are nine Vulture Conservation and Breeding Centres (VCBC) in India, of which three are directly administered by the Bombay Natural History Society (BNHS).
