

Swiss Women Climate Change Case

[Source: IE](#)

Why in News?

The recent ruling by the **European Court of Human Rights (ECHR)** in favour of a group of Swiss women has significant implications for [climate change](#) litigation.

What was the Swiss Women Climate Change Case?

- **Petitioners:** The case was brought against the Swiss government by **KlimaSeniorinnen Schweiz (Association of Senior Women for Climate Protection Switzerland)**, a group of women climate activists all above the age of 64.
- **Claim:** The women argued that the **Swiss government's inadequate climate policies violate their right to life** and other guarantees under the **European Convention on Human Rights**.
- **Medical Vulnerability:** The petitioners highlighted their medical vulnerability as senior citizens to [extreme heat caused by climate change](#).
 - Reports by the [Intergovernmental Panel on Climate Change \(IPCC\)](#) show that the Swiss population of senior women, especially those **over 75 are more prone to heat-related medical problems** like 'dehydration, hyperthermia, fatigue, loss of consciousness, heat cramps and heat strokes.
- **Court's Verdict:**
 - The ECHR noted that individuals have the right to effective protection from the serious adverse effects of climate change on their lives, health, well-being, and quality of life under **Article 8 of the convention**.
 - Article 8 of the Convention of Human Rights **includes the right for individuals to be protected by the state from the serious effects of climate change** on their lives.
 - The court found that the **Swiss government had not enacted adequate laws** to combat climate change impacts and failed to meet [greenhouse gas \(GHG\) emission goals](#).
- **Significance of Ruling:**
 - The **ECHR's verdict applies to 46 member states, including all European Union countries, plus the United Kingdom (UK) and various other non-EU countries**.
 - Climate and human rights cases in European courts must now heed ECHR's judgement, potentially spurring similar filings across member countries.
 - The global rise in climate litigation saw 2,180 cases filed by 2022, increasing from 884 in 2017 and 1,550 in 2020, according to the **Global Climate Litigation Report: 2023 Status Review**.
 - This trend could spur further accountability, with judgments potentially impacting climate litigation worldwide.
 - The ruling emphasises the need to align policies with climate science.

Similar Cases

- In 2017, a 9-year-old girl from Uttarakhand filed a case in India, arguing that the **country's environmental laws and climate policies require greater action** to address climate change. However, her petition was ultimately rejected.

- In August 2023, Montana youths won a case against the state government, which **neglected climate change while approving fossil fuel projects**, violating their constitutional right to a clean environment.

Protection Rights in India against Climate Change Impact

- The Indian Supreme Court broadened the scope of [Articles 14 \(right to equality\)](#) and [21 \(protection of life and personal liberty\)](#), stating that **people have the right to be free from the adverse effects of climate change**.
