

IMO Green Voyage2050 Project

India has been recognized as the pioneer lead country for the International Maritime Organization (IMO) Green Voyage2050 Project, a significant stride toward mitigating Green House Gas (GHG) emissions from ships.

- The GreenVoyage2050 Project is a partnership project between the Government of Norway and IMO launched in 2019 aiming to transform the shipping industry towards a lower carbon future.
- The Initial IMO Strategy sets out a clear vision to cut total annual GHG emissions by a minimum of 50% by 2050, relative to 2008 levels.
- The GreenVoyage2050 Project is working with 12 countries: Azerbaijan, Belize, China, Cook Islands, Ecuador, Georgia, India, Kenya, Malaysia, Solomon Islands, South Africa, and Sri Lanka.
 - The participating countries can be broadly categorised into "New Pilot Countries" and Vision "Pioneer Pilot Countries".

//

MAIN COMPONENTS OF THE PROJECT

COMPONENT 1 COMPONENT 2 Developing global tools to Capacity building, policy and NAP development support implementation of the Initial IMO GHG Strategy **COMPONENT 3 COMPONENT 4** (A) Strategic partnership Technology cooperation, development innovation and pilot demonstrations
