

Nag River

Why in News

Recently, the Bombay High Court said that the Nag river has become extremely polluted due to industrialisation and urbanisation.

Key Points

- The **Nagpur city derives its name from the Nag river** which passes through the city.
- The Nag river **originates** from the **Ambazari Lake** in west Nagpur.
- Major Tributaries - **Pili river.**
- End point - confluence with **Kanhan River.**
