

## Initiative for Flue-cured Virginia (FCV) Tobacco Farmers

## **Source: PIB**

- Flue-cured Virginia (FCV) <u>Tobacco</u> is predominantly cultivated in India, primarily in **Andhra Pradesh** and **Karnataka**, with the current crop season underway.
- The <u>Michaung cyclone</u> caused heavy rains in Andhra Pradesh, severely affecting the FCV tobacco crop across several districts.
  - Against this backdrop, the Government of India has approved an **interest-free loan** of Rs 10,000 from the <u>Grower Welfare Fund</u> of the <u>Tobacco Board</u> for FCV Tobacco growers in Andhra Pradesh.
- Flue-cured Virginia (FCV) Tobacco:
  - FCV tobacco is an important commercial crop grown during kharif as rainfed crop predominantly on red sandy loam soils.
  - The FCV tobacco cultivated in **Karnataka Light Soils** is **known** as **'Mysore style tobacco'.** 
    - Curing prepares harvested tobacco for market by standardising the process to achieve desired leaf qualities and remove moisture.
- India grows ten distinct types of tobacco in 15 states, including cigarette (FCV, burley, Oriental) and non-cigarette types (Bidi, chewing, hookah and cigar), making it the world's second-largest producer and exporter of tobacco.
