

Household Consumer Expenditure Survey

For Prelims: Household Consumer Expenditure Survey, NSSO, NSO

For Mains: Significance of conducting Household Consumer Expenditure Survey

Why in News?

The **All-India Household Consumer Expenditure Survey** is set to resume this **year** (2022) after a prolonged break.

 The results will include separate data sets for rural and urban parts, and splice spending patterns for each State and Union Territory, as well as different socio-economic groups.

Why has the Government Stopped Conducting the Survey?

- The government had **discontinued the findings of the last Survey,** conducted in 2017–18, citing **"data quality" issues**.
 - In 2019, the government had dismissed reports that the 2017-18 Survey findings were being withheld due to adverse outcomes reflecting a decline in consumer spending.
- It was also noted that there was a significant increase in the divergence in not only the levels in the consumption pattern but also the direction of the change when compared to the other administrative data sources like the actual production of goods and services.
- There were also concerns about the "ability/sensitivity of the survey instrument to capture consumption of social services by households especially on health and education.

What is a Household Consumer Spending Survey?

- Time Interval:
 - Traditionally, a quinquennial (recurring every five years) survey conducted by the <u>National Sample Survey Office - NSSO</u> (comes under the <u>National Statistical Office</u>), Ministry of <u>Statistics</u> and Programme Implementation.
- Scope:
 - **Collects information on the consumption spending patterns** of households across the country, both urban and rural.
- Information Generated:
 - Reveals the average expenditure on goods (food and non-food) and services.
 - Helps generate estimates of household Monthly Per Capita Consumer
 Expenditure (MPCE) as well as the distribution of households and persons over the MPCE classes.
- Significance in General:
 - Helps in calculating the demand dynamics of the economy.
 - **Helps in understanding the shifting priorities** in terms of baskets of goods and services, thus providing pointers to the producers of goods and providers of services.
 - **To assess living standards** and growth trends across multiple strata.

Significance for Policymakers:

- The **CES** is an analytical as well as a forecasting tool which helps the Government in planning required interventions and policies.
- **To spot and address possible structural anomalies** that may cause demand to shift in a particular manner in a specific socio-economic or regional division of the population.
- To rebase the **Gross Domestic Product (GDP)** and other macro-economic indicators.
