

PRITHvi Vigyan Scheme

For Prelims: PRITHvi Vlgyan (PRITHVI) Scheme, ACROSS Scheme, O-SMART Scheme, PACER

For Mains: Earth System Sciences, Modeling systems for understanding climate change science, Government Policies, Disaster Management

Source: PIB

Why in News?

The Union Cabinet recently approved the comprehensive scheme "PRITHVI VIgyan (PRITHVI)" by the Ministry of Earth Sciences.

- This initiative spans five sub-schemes, aiming to enhance Earth System Sciences and provide crucial services for societal, environmental, and economic well-being.
- The Cabinet also approved an agreement between the <u>Indian Space Research Organisation</u> (ISRO) and Mauritius Research and Innovation Council (MRIC) to jointly develop a "small satellite."

Note

 India and Mauritius have a history of cooperation since the 1980s when ISRO established a ground station in Mauritius for tracking and telemetry support for ISRO's launch vehicle and satellite missions.

What is the "PRITHvi VIgyan (PRITHVI)" Scheme?

- About:
 - It is an overarching scheme of the Ministry of Earth Sciences (MoES) for the period from 2021 to 2026.
 - It encompasses five ongoing sub-schemes, namely:
 - ACROSS: Atmosphere and Climate Research-Modelling Observing Systems & Services.
 - O-SMART: Ocean Services, Modelling Application, Resources and Technology.
 - PACER: Polar Science and Cryosphere Research.
 - **SAGE:** Seismology and Geosciences
 - The scheme includes six activities, including seismological monitoring and microzonation. SAGE aims to strengthen earthquake monitoring and research on the Earth's solid components.
 - REACHOUT: Research, Education, Training and Outreach.

- PRITHVI scheme comprehensively addresses the five components of Earth System
 Sciences: atmosphere, hydrosphere, geosphere, cryosphere, and biosphere.
 - This holistic approach aims to enhance understanding and deliver reliable services for the country.

Objectives:

- To augment and sustain long-term observations of the atmosphere, ocean, geosphere, cryosphere and solid earth to record the vital signs of the Earth System and change
- Development of modelling systems for understanding and predicting weather, ocean and <u>climate hazards</u> and understanding the science of <u>climate change</u>.
- Exploration of polar and high seas regions of the Earth towards discovery of new phenomena and resources;
- Development of technology for exploration and sustainable harnessing of oceanic resources for societal applications.
- Translation of knowledge and insights from Earth systems science into services for societal, environmental and economic benefit.

Benefits for India:

- PRITHVI provides advanced warning services for natural disasters like cyclones, floods, heatwaves, and earthquakes, facilitating prompt and effective disaster management.
 - Additionally, the scheme ensures precise weather forecasts for both land and oceans, enhancing safety and minimizing property damages in adverse weather conditions.
- PRITHVI extends its reach to explore the three poles of the Earth; <u>Arctic</u>, <u>Antarctic</u>, <u>and Himalayas</u> facilitating valuable insights and knowledge <u>about these regions</u>.
- The scheme encourages the development of technology for exploration and sustainable harnessing of oceanic resources, aligning with modern advancements in Earth Science.
