### What is G7?

- G-7 is a group of the most developed and advanced economies of the world. I.e. France,
   Germany, Italy, the United Kingdom, Japan, the United States, and Canada.
- The origin of <u>G-7</u> can be traced back to the **Oil Crisis of 1973** and the resulting financial crisis, which forced the leaders of 6 major industrial nations to convene a meeting in 1975.
- Canada joined in 1976, leading to the formation of the G7.
- It was known as the 'G8' for several years after the original seven were joined by Russia in 1997, but it was renamed as G7 after Russia was expelled as a member in 2014 following its annexation of the Crimea region of Ukraine.

## Which Kind of Opportunities are Available for India at This Summit?

- India as Strategic Pivot:
  - India is strategic pivot in global coperation due to facts that it is most populous country, largest democracy, one of the largest markets and 5th largest global economy and is ahead of 4 out of G-7 economies France, Italy, UK and Canada.
- India as Voice of Global South:
  - India has also emerged as the <u>voice of the global south</u> in recent yeras specially after successfully hosting the <u>G-20 summit</u> in 2023.
  - India can raise common issues of the global south like <u>climate change</u>, <u>energy security</u>
     , <u>food security</u> etc at these platforms.
  - India can play an important role in fostering cooperation on development of African region, African Developmental agenda.
- Economic Opportunities:
  - India and the <u>global south</u> is also an **investment destination** for rich G-7 member countries. India is a stable economy for investment with a safe and secure political climate.
- India as Largest Democracy:
  - India is a supporter of <u>rule of law</u>, freedom and <u>democracy</u> that finds an important place in G-7 objectives.
- Addressing Global Challenges:
  - Global solidarity on global challenges like <u>climate change</u>, <u>cyber security</u> and <u>Artificial Intelligence (AI)</u>.

#### What are the Challenges Associated with G7?

- Elite Men's Club-
  - **G-7** is seen as a group of developed nations whose priorities are different from developing countries.
  - G-7 members need to address concerns of developing countries by coperation with them.
- Subtle Shift of Power:

- In 2008, while the G-8 talked about <u>food inflation</u> and all kinds of other admittedly important world issues, they completely missed the <u>2008 global financial crisis</u>.
- With the inclusion of the **African Union** in the G20 group in 2023 relevance of **G-20** group has increased as compared to G7 in resolving global issues.

### Expansion of G-7:

Expanding the G-7 by inclusion of countries like India seems a **distant goal** as India is a
developing country and is behind other countries in the grouping in terms of **per capita**income.

#### Informal Group:

• The G-7 is an **informal bloc** and takes no mandatory decisions, so the group's declarations at the end of the summit are **not binding**.

## **Way Forward**

## Diplomacy and Dialogue:

 India can act as a bridge between developed and developing countries as it has shown a sense of moderation and a sense of responsibility.

#### Symbolic and Substantive Significance for India:

 India's presence at the G7 summit has symbolic and substantive significance as India is a strategic partner of most of the G7 countries.

#### Regional and Global Issues:

 Global platforms provide an opportunity to showcase India's unique approach and perspective to global issues with the approach of Vasudhaiv Kutumbakam.

#### Reforming G-7 Approach:

 It has been recognised that, G-7 being seen as a group of elite countries, global issues can not be resolved within G7 itself so, there is a need to reform the approach to address global issues.

## **Artificial Intelligence (AI):**

#### About:

- Al is defined as the ability of machines and systems to acquire and apply knowledge and to carry out intelligent behaviour.
  - The term "Artificial Intelligence" was coined by John McCarthy, an American computer scientist and cognitive scientist. He was one of the founders of the discipline of Al.
- It includes technologies like <u>machine learning</u>, <u>Deep Learning</u>, <u>Big Data</u>, <u>Neural Networks</u>, Computer vision, <u>Large Language Models</u> etc.
