

India Development Report: WB

For Prelims: World Bank, GDP, GVA, Capital Expenditure, Investment, Human Capital Index, World Development Report.

For Mains: India Development Report: WB, GDP.

Why in News?

The [World Bank \(WB\)](#) in its **India Development Report** titled '**Navigating the Storm**', upgraded its growth forecast for **India's economy in 2022-23 to 6.9%**.

- In October 2022, the WB had cut India's [GDP \(Gross Domestic Product\)](#) growth forecast to 6.5 % from 7.5 % earlier.

What are the Key Highlights?

- **Growth Projection:**
 - The Bank expects the Indian economy to grow at a slightly slower **6.6% in 2023-24** as a **challenging external environment and faltering global growth** will affect its economic outlook through different channels.
- **Growth Drivers:**
 - India's resilience in economic activity **despite a deteriorating external environment.**
 - India's economy has been remarkably resilient to the deteriorating external environment, and strong macroeconomic fundamentals have placed it in good stead compared to other emerging market economies.
 - Strong private consumption and [investment](#).
 - The government's **focus on bolstering [capital expenditure](#)** also supported domestic demand in the first half of 2022-23.
 - India has **a large domestic market and is relatively less exposed** to international trade flows
 - Continued robust growth of domestic demand at the start of Q3 (October to December quarter), 2022-23.
 - A well-crafted and prudent policy response to global spillovers is helping India navigate **global and domestic challenges.**
- **Challenges:**
 - The impact of a tightening **global monetary policy cycle, slowing global growth and elevated commodity prices (inflation) and rising borrowing costs will affect domestic demand**, particularly private consumption in FY2023/24, while slowing global growth will inhibit growth in demand for India's exports. These factors mean that the Indian economy will experience lower growth in FY23 compared to FY22.
- **Suggestions:**
 - The renewable energy and green economy sectors can create a lot of jobs.
 - It cautions about trade-offs between trying to limit the adverse impact of global spillovers on growth and the available policy space.
