

Kalesar Wildlife Sanctuary

Source: Live Law

Recently, the Supreme Court stayed the construction of four proposed dams inside <u>Kalesar Wildlife</u> <u>Sanctuary</u> in Haryana's Yamunanagar district as the construction will not only negatively impact the <u>wildlife</u> and local community but also harm the ecosystem.

- It was established in 1988 to protect the local wildlife and biodiversity and was declared a National Park on 8th December 2003.
- It is situated in the foothills of the **Shiwalik ranges** of the Himalayas and is contiguous to Rajaji National Park (Uttarakhand) and **Simbalbara National Park** (Himachal Pradesh).
- It is spread across 13,209 acres and is rich in biodiversity, featuring dense sal and khair forests and grassland patches supporting diverse plant and animal life.
- It is home to many species of animals, including leopards, sambar deer, barking deer, hyenas, jackals, Indian porcupines, Indian pangolins, and langurs and several species of birds, such as the red junglefowl, grey partridge, Indian peafowl, and white-throated kingfisher
