

India's Largest Leopard Safari

Source: TH

Recently, India's largest leopard safari has been inaugrated at <u>Bannerghatta Biological Park (BBP)</u> in Bengaluru, Karnataka.

- The leopard safari at BBP covers an area of 20 hectares. It features an undulating terrain with naturally occurring rocky formations and partially deciduous forests, and is currently home to 8 leopards.
- Bannerghatta Biological Park (BBP) was separated from Bannerghatta National Park (BNP) in
 2004 and gained its status as a national park in 1974.
 - It is home to free ranging leopards (Panthera Pardus).
 - It has 4 sections: the zoo, the safari, the butterfly park, and the rescue center.
 - The park also includes the valley of the **Champakadhama** hills within its boundaries.

LEOPARD

- The leopard is the smallest of the Big Cat family and is known for adapting in various habitats.
- A nocturnal animal feeds on smaller species of herbivores found in its range, such as the chital, hog deer and wild boar.
- A melanistic leopard is often called a black panther and is mistakenly thought to be a different species.
- Madhya Pradesh has the highest number of leopards (3,907), followed by Maharashtra, Karnataka, and Tamil Nadu.
