

Rise of India's External Debt

Source: TH

India's External debt increased by **USD 39.7 billion** from March 2023 to reach **USD 663.8 billion** as of end-March 2024.

- External Debt is money borrowed from a source outside the country, which needs to be repaid in the borrowed currency.
 - It can be obtained from foreign commercial banks, international financial institutions such as the <u>IMF</u> and the <u>World Bank</u>, and from foreign governments.
- The external <u>debt-to-GDP ratio</u> declined from 19.0% at end-March 2023 to **18.7**% at end-March 2024.
- There was a **USD 45.6 billion increase** in **long-term debt** (maturing in over a year) to reach USD 541.2 billion in March 2024.
 - Proportion of short-term debt (maturing in up to a year) decreased from 20.6% to 18.5%.
 - The ratio of short-term debt to forex reserves declined from 22.2% to 19%.
- India's external debt as of March 2024 was primarily in **US Dollars (53.8%),** followed by Indian rupees (31.5%), yen (5.8%), <u>SDR</u> (5.4%), and euro (2.8%).
 - There was an increase in debt of both government and non-government sectors.
- Non-financial corporations held the **highest share** of outstanding debt (37.4%) followed by deposit-taking corporations (except the central bank)(28.1%), general government (22.4%) and other financial corporations (7.3%).
- Loans constitute 33.4% of external debt, followed by currency and deposits (23.3%), trade credit and advances (17.9%), and debt securities (17.3%).
