

Common Services Centres (CSC)

Why in News

Recently, the **Common Services Centres (CSC)** has received approvals to manage and **operate Passport Seva Kendra kiosks in rural areas.**

Key Points

About CSC:

- It is an initiative of the Ministry of Electronics & IT (MeitY).
- The CSC is a strategic cornerstone of the <u>National e-Governance Plan (NeGP)</u>, approved by the Government in May 2006, as part of its commitment in the <u>National Common</u> <u>Minimum Programme</u> to introduce <u>e-governance on a massive scale</u>.
- The objective of CSCs is to provide high quality and cost-effective video, voice and data content and services, in the areas of e-governance, education, health, telemedicine, entertainment as well as other private services.
- The Scheme creates a conducive environment for the private sector and NGOs to play an active role in implementation of the CSC Scheme, thereby becoming a partner of the government in development of rural India.
- The PPP (Public Private Partnership) model of the CSC scheme envisages a 3-tier structure consisting of the:
 - CSC operator (called Village Level Entrepreneur or VLE);
 - **Service Centre Agency** (SCA), that will be responsible for a division of 500-1000 CSCs; and
 - **State Designated Agency (SDA)** identified by the State Government responsible for managing the implementation in the entire State.

CSC and Digital India:

- <u>Digital India</u> is a flagship programme of India with a vision to transform India into a
 digitally empowered society and knowledge economy.
- CSCs enable the three vision areas of the Digital India programme:
 - Digital infrastructure as Utility to Every Citizen.
 - Governance and services on demand.
 - Digital empowerment of citizens.

• CSC 2.0:

- It was launched in 2015, expanding the programme's outreach to all gram panchayats in the country. At least one CSC is envisaged in each of the 2.5 lakh Gram Panchayats.
- CSC 2.0 is a service delivery oriented entrepreneurship model with a large bouquet
 of services made available for the citizens through optimum utilization of infrastructure
 already created in the form of State Wide Area Network (SWAN), State Service Delivery
 Gateway (SSDG), e-District, State Data Centre (SDC), and (National Optical Fiber Network
 (NOFN)/BharatNet.
