

Pobitora Wildlife Sanctuary

Recently, due to the anthrax, two Asiatic Water Buffaloes died in the Pobitora Wildlife Sanctuary.

Asiatic Water Buffalo

- The Asiatic Wild Water Buffalo is scientifically known as **Bubalus Arnee** is known to be found **in the Central Indian Forests** and is mostly restricted to the states of Assam, Arunachal Pradesh and Madhya Pradesh.
 - Recently, it was found in the forests of Maharashtra after which the Maharashtra Government declared the **Kolamarka forest area** as a conservation reserve for the Asiatic Wild Buffalo.
 - Asiatic buffalo has the **widest horn span** among all bovinds found globally.
 - The wild buffalo is mainly found in the alluvial grasslands, marshes, swamps and river valleys. They are generally found in areas that have plenty of water holes and resources.
- The Asiatic wild buffaloes are of enormous **economic significance** as they are the direct ancestors of all the breeds of the domestic buffaloes.
 - However, over time their **population** has **decreased** at an alarming rate because of various reasons such as poaching, loss of habitat and breeding with domestic buffaloes.

- **Protection Status:** //
 - It has been listed as an endangered species by the [International Union for Conservation of Nature \(IUCN\)](#).
 - It is listed under Schedule-1 of the [Wild Life \(Protection\) Act, 1972](#).
 - It is included in [CITES Appendix-III](#) and is legally protected in Bhutan, India, Nepal, and Thailand.
 - Wild Water Buffalo is believed to be **extinct** in Bangladesh, Peninsular Malaysia, and on the islands of Sumatra, Java, and Borneo.

Pobitora Wildlife Sanctuary

- **Pobitora Wildlife Sanctuary** has the **highest density** of **one-horned rhinos** in the world and **second highest concentration** in Assam after **Kaziranga National Park**.
 - It is often called '**Mini Kaziranga**' due to similar landscape and vegetation.
- The wildlife sanctuary is home to **endangered one-horned rhinoceros** and the other mammals such as **Leopard, Leopard cat, Fishing cat, Jungle cat, Feral Buffalo, Wild pigs, Chinese pangolins, etc.**
- About 72% of Pobitora Sanctuary consists of **wet savannah** of Arundo donax and Saccharum. The remaining area is covered by water bodies.
 - **Water hyacinth** (an invasive aquatic plant) is a major problem to the area especially to waterfowl, as it forms thick mats on the water surface.
- There are **5 national parks** in Assam namely,
 - Dibru-Saikhowa National Park,
 - Kaziranga National Park,
 - Manas National Park,
 - Nameri National Park,
 - Rajiv Gandhi Orang National Park.

Anthrax

- It is a serious **infectious disease** that is caused by a **bacteria** known as Bacillus anthracis.
- Although it is rare but it can sometimes become **fatal** for humans if they get infected with anthrax when they come in contact with infected animals or contaminated animal products.
- It is characterized by symptoms like blisters on the skin, chest pain, vomiting, diarrhea, and fever.
