

High Power Demand Amid Heatwave

Why in News?

Gurugram is facing a significant increase in electricity demand due to the current heatwave. Recently, the **power demand** reached a record high of **482.3 lakh units (LU)** as the temperature soared to 47 degrees, marking an 84% rise from 2023.

Key Points

- The high demand for electricity is causing significant stress on the city's power distribution system. People all over the city are experiencing unplanned power outages and frequent changes in voltage, resulting in nights without proper rest.
- The Vision According to the officials, they are diligently overseeing the situation and implementing **necessary measures** to avoid power outages or failures.
