

Shambhu River

Why in News?

The **Shambhu river** at Kunwari village in **Bageshwar district of Uttarakhand** has once more created a **man-made lake**, covering an area of around 2 square kilometers, **causing concern among the locals about an imminent disaster.**

Key Points

- This revival of the significant lake is reminiscent of previous events in 2022 and 2023 when comparable formations caused by <u>landslides</u> obstructing the river's course led to prompt administrative actions to prevent potential flooding downstream.
- The **Shambhu river originates from Bageshwar** and **joins the <u>Pindar river</u> in Chamoli** district.
