

India's Manufacturing PMI Rises

The manufacturing sector in India showed signs of recovery in November from October's eight-month low pace, with the S&P Global India Manufacturing [Purchasing Managers' Index \(PMI\)](#) rising to 56 from 55.5. However, the growth of export orders was the slowest since June.

- PMI data are compiled by **S&P Global** for more than 40 economies worldwide.
- The PMI dataset features a headline number, which indicates the **overall health of an economy**, and sub-indices, which provide insights into other key economic drivers such as [Gross Domestic Product \(GDP\)](#), [inflation](#), exports, capacity utilization, employment and inventories.
 - The headline **PMI is a number from 0 to 100.**
 - A PMI above 50 represents an expansion when compared with the previous month.
 - A PMI reading under 50 represents a contraction while a reading at 50 indicates no change.
