

# **Ambergris**

### Why in News

Recently, the Mumbai Police has arrested five people and seized nearly 9 kg of Ambergris.

# **Key Points**

- About:
  - Ambergris, French for grey amber, is generally referred to as whale vomit.
  - It is a solid waxy substance originating in the intestine of the sperm whale.
    - Ambergris is produced only by an estimated 1% of sperm whales.
  - Chemically, ambergris contains alkaloids, acids, and a specific compound called ambreine, which is similar to cholesterol.
  - It floats around the surface of the water body and at times settles on the coast.
  - Because of its high value it is referred to as floating gold. 1 kg of ambergris is worth
     Rs 1 crore in the international market.
- Use:
  - It is used in the perfume market, especially to create fragrances like musk.
    - It is believed to be in **high demand in countries like Dubai that have a large perfume market.**
  - Ancient Egyptians used it as incense. It is also believed to be used in some traditional medicines and as a spice.
- Smuggling:

- Due to its high value it has been a target for smugglers especially in coastal areas.
  - There have been several cases where the coastline of Gujarat has been used for such smuggling.
- Since the sperm whale is a protected species, hunting of the whale is not allowed.
   However, smugglers are known to have illegally targeted the fish in order to obtain the valuable Ambergris from its stomach.

## **Sperm Whale**

About:

- Sperm whale, (Physeter catodon), also called cachalot, the largest of the toothed whales, easily recognized by its enormous square head and narrow lower jaw.
- The sperm whale is dark blue-gray or brownish, with white patches on the belly. It
  is thickset and has small paddle-like flippers and a series of rounded humps on its
  back.
- Habitat:
  - They are found in temperate and tropical waters throughout the world.
- Threats:
  - The greatest threats to sperm whales are those of habitat impacts including noise pollution and climate change.
  - Other threats include **entanglement** in fishing gear, **collisions with ships**, and proposals to allow for a **commercial hunt** once again.
- Protection Status:
  - <u>IUCN Red List</u>: Vulnerable
  - CITES: Appendix I
  - Wildlife (Protection) Act, 1972: schedule I
