

Aroma Mission & Floriculture Mission

Why in News

Recently, the Union Minister of State Science & Technology has proposed **Integrated Aroma Dairy Entrepreneurship** for Jammu & Kashmir to augment the income of farmers.

- The Aroma Mission, also popularly referred as "**Lavender or Purple Revolution**", has started from J&K and transformed the lives of farmers who are able to grow lavender, make lucrative profit and improve their lives.
- Earlier, the **floriculture mission** was launched in 21 States and Union Territories.

Key Points

- **Aroma Mission:**

- **Objectives:**

- To **promote the cultivation of aromatic crops for essential oils** that are in great demand by the aroma industry.
- To enable Indian farmers and the aroma industry **to become global leaders** in the production and export of some other essential oils on the pattern of menthol mint.
- To **provide substantial benefits** to the farmers in achieving higher profits, utilization of waste lands and protection of their crops from wild and grazing animals.

- **Nodal Agencies:**

- The nodal laboratory is **CSIR-Central Institute of Medicinal and Aromatic Plants (CSIR-CIMAP), Lucknow**.
- The participating laboratories are CSIR-Institute of Himalayan Bioresource Technology (CSIR-IHBT), Palampur; CSIR-Indian Institute of Integrative Medicine (CSIR-IIIM), Jammu etc.

- **Coverage:**

- The scientific interventions made under the mission project provided assured benefits to the growers of Vidarbha, Bundelkhand, Gujarat, Marathwada, Rajasthan, Andhra Pradesh, Odisha and other states **where farmers are exposed to frequent episodes of weather extremes and account for maximum suicides**.
- **Aromatic Plants** include lavender, damask rose, mushk bala, etc.

- **Launch of Second Phase:**

- **CSIR-IIIM-Jammu** announced **Aroma Mission phase-II** in February, 2021 after the success of the first phase.
- It **focuses on** setting up of cooperatives for marketing, promotion of cultivation and processing of high value medicinal and aromatic plants (MAPs), development of superior varieties and their agro technologies, setting up of distillation units and

processing facilities, skill and entrepreneurship development, value-addition and product development from MAPs.

- **Significance:**

- Apart from being in sync with government policy of doubling farm incomes by 2022, the mission also provided **employment to the women farmers** thus giving impetus to **inclusive growth**.

- **Floriculture Mission:**

- **Floriculture:**

- It is a branch of **horticulture** that deals with the cultivation, processing and marketing of ornamental plants vis-à-vis landscaping of small or large areas, and maintenance of gardens so that the surroundings may appear aesthetically pleasant.

- **Objectives:**

- To focus on commercial floral crops, seasonal/annual crops, wild ornaments and cultivation of flower crops for honey bee rearing.
- Some of the popular crops include Gladiolus, Canna, Carnation, Chrysanthemum, Gerbera, Liliium, Marigold, Rose, Tuberose etc.

- **Implementing Agencies:**

- Along with **Council of Scientific and Industrial Research (CSIR)**, other implementing agencies involved are:

- **Indian Council of Agricultural Research (ICAR)**
- **Khadi and Village Industries Commission (KVIC)**
- **APEDA and TRIFED**
- Fragrance and Flavour Development Centre (FFDC), Kannauj, and
- **Ministry of Commerce** and **Ministry of Micro, Small and Medium Enterprises (MSME).**

- **Floriculture Market:**

- The Indian Floriculture market was worth INR 157 Billion in 2018. The floriculture market is expected to reach a value of INR 661 Billion by 2026, exhibiting a CAGR (Compound Annual Growth Rate) of 19.2% during 2021-2026.

- **Significance:**

- **Employment generation:** Floriculture has the potential to provide employment to a large number of people through nursery raising, floriculture farming, entrepreneurship development for nursery trade, value addition and export.
- **Import Substitution:** India has diverse agro-climatic and edaphic conditions (physical, chemical, and biological properties of soil), and rich plant diversity, still it shares only 0.6% of the global floriculture market.
- At least 1200 million USD worth of floriculture products are being imported by India every year from different countries.
