### Why in News?

Recently, the <u>Ministry of Environment</u>, <u>Forests and Climate Change (MoEFCC)</u> reversed its decision to **establish integrated regional offices** by merging key environmental bodies under its umbrella.

### What was the Initial Proposal of the MoEFCC?

#### Proposal:

- The initial plan, announced during the Covid-19 lockdown, aimed to bring together the
  Forest Survey of India (FSI), the National Tiger Conservation Authority (NTCA),
  the Wildlife Crime Control Bureau (WCCB), and the Central Zoo Authority (CZA) under a
  unified structure.
  - This move was intended to streamline operations and create a single point of authority for these organizations.

#### Criticisms:

- It would **undermine the independence and authority of these bodies**, which have different mandates and roles in environmental governance.
- It would create administrative confusion and chaos, as these bodies have different reporting structures and jurisdictions.
- It would compromise the quality and credibility of their work, as they would be subject to political interference and pressure from the MoEFCC.
- It would dilute the focus and expertise of these bodies, which have specialised functions and skills in their respective domains.

#### Reversal of Decision:

- The recent notification from the MoEFCC not only scrapped the merger plan but suggests rearranging the current regional offices, and this plan is also facing criticism.
  - For instance, the Bengaluru regional office would have had jurisdiction of three states and a Union Territory with different geography and environment:

    Karnataka, Kerala, Goa, and Lakshadweep.
  - Concerns were also raised over the recent plan to merge <u>Project Tiger</u> and <u>Project Elephant</u>, potentially affecting the autonomy and importance of these initiatives.
