

Air Traffic Management Systems

Why in News

Recently, the <u>Airports Authority of India (AAI)</u>, under its R&D initiative, has signed an agreement with <u>Bharat Electronics Limited (BEL)</u> to jointly develop indigenous **Air Traffic Management System.**

Under this Agreement, BEL and AAI will jointly develop Civil Air Traffic Management System
(ATMS) with Advanced-Surface Movement Guidance and Control System (ASMGCS), a
complex ground surveillance system that manages air traffic at airports and in Indian Civil Airspace
for safe operation of flights from take-off to landing.

What is the Air Traffic Management System?

- Air traffic management and control primarily involves the control of traffic in and around airports, airport terminals and airspace.
- Air traffic controllers that work from Air Traffic Control (ATC) towers are responsible for ensuring a safe distance between all aircraft, both in the air and on the ground, to prevent accidents.
- Air traffic controllers prevent collisions and maintain an orderly flow of air traffic. The commonly used technologies and systems in air traffic management and control include:
 - Surface movement and surveillance <u>radars</u>
 - Holographic radar
 - Navigation and surveillance systems
 - Voice communication control systems
 - Ultra-high frequency (UHF) and very high frequency (VHF) communication systems
 - Flight data information display equipment
 - Radio modems and transceivers
 - Collision avoidance systems
 - Noise monitoring systems
 - Meteorological sensors and displays
 - Airfield lighting control and monitoring
 - Training management software

What are the Objectives and Significance of the Agreement?

- It will help in leveraging the complementary strengths and capabilities of BEL and AAI and enabling both to address airport modernization opportunities.
- It will ensure safety, maintain separation between multiple aircraft, and efficient management of operations at the airport and Indian airspace.
- It aims to upgrade its ANS (Air Navigation Services) Infrastructure in systematic, efficient and cost-effective manner and in compliance with the <u>'Atma Nirbhar Bharat'</u> missions of the Government of India.
- It will reduce AAI's foreign dependency for procurement of ANS infrastructure.
