

Auto Trigger Mechanism in RCEP

Recently, India has stated it will push for several crucial issues for acceptance at negotiating round of the **RCEP countries** that have started in Jakarta.

Key demands of India

- To protect the domestic industry, India proposes the 'auto-trigger' mechanism to check import surges.
 - According to it, in case there is a flood of imports (once duties are eliminated or reduced for RCEP members), after reaching a certain threshold, the auto-trigger of safeguard duties on imports should be initiated.
 - Through this India can accord some protection to its local industry.
- India is opposed to the proposed Investor-State Dispute Settlement (ISDS) body, as it does not want its domestic laws to be challenged outside India.
 - However, RCEP countries are in favour of ISDS, because of certain issues faced by companies in India like:
 - Operational permits of international investors in telecom companies were cancelled by the Supreme Court in the wake of the **2G scam.** etc.
- India is pushing for stringent norms for 'Rules of origin' to prevent goods being routed through nations with lower duties
 - India is apprehensive that after signing of RCEP, the Indian market will be flooded with the cheap import of the third country which is not a member of RCEP but has signed FTA with other RCEP member.
- Rules of origin are the criteria needed to determine the national source of a product. Their
 importance is derived from the fact that duties and restrictions in several cases depend upon the
 source of imports.
- Apart from this India wants greater market access in the services sector.
