

Education Through Radio in Odisha

Why in News

Recently, the state government of **Odisha has decided to reach out to children in remote areas through the [radio](#)** as online classes fail to reach most students due to poor mobile connectivity.

Key Points

▪ Education Through Radio:

- The state's **School and Mass Education Department** has launched **classroom teaching through All India Radio**.
- Students from **Class I to VIII** can learn their lessons through **15-minutes of teaching by experienced teachers** through radio.
 - It has been highlighted that a student can **cover six pages of his textbook within 15 minutes** of a radio programme.
- Although teaching through radio **would not be effective as it could have been in a physical classroom**, the dire situation has **forced the administration to try different methods** for reaching students.

▪ Other Initiatives:

- Students have been provided with textbooks even though schools in Odisha have been closed since **17th March 2020**.
- **Three hours of classroom instruction** are also available **through Doordarshan**.
- Since considerable time has been lost due to the closure of schools, school **syllabus has been reduced by 30%**.

▪ Reasons for the Move:

- The schools could not be opened due to **Covid-19 pandemic** so the education department **tried to reach students with online classes**, mostly through smartphones.
 - However, out of the 60 lakh students, hardly 22 lakhs were being reached during the lockdowns.
- The **situation worsened when the [lockdown](#) was lifted** and **parents started going to their workplaces taking the only smartphone in the family** with them.
 - It led to a further **drop of 6 to 7 lakh students attending virtual classes**.
- Those who have a sufficient number of smart devices for students, **suffer due to poor network coverage**.

Other Nationwide Initiatives for Education

- Centre's announcement to **start the 2020-21 academic year virtually**.
 - **Plans to distribute [laptops or tablets to 40% of all college and university students](#)** over the next five years and to equip all government schools with **[Information and](#)**

Communication Technology (ICT).

- Digital Infrastructure for Knowledge Sharing (DIKSHA) mobile app has been offered to the states as a platform to provide content in local languages.
- The **Kendriya Vidyalaya Sangathan** has deployed its SWAYAM Prabha portal which has lectures on direct-to-home (DTH) and online, to help students.
- **Different e-learning techniques through virtual platforms** like YouTube, Zoom app and Google Classroom are being used by some institutions.
- PRAGYATA guidelines on digital education.
