

Sandes: Government Instant Messaging System

Why in News

The National Informatics Centre (NIC) has launched an instant messaging platform called Sandes on the lines of WhatsApp.

 NIC is under the aegis of the Ministry of Electronics and Information Technology. It provides network backbone and e-Governance support to the Central Government, State Governments and UT Administrations.

Key Points

- Sandes App:
 - About:
 - It is a Government Instant Messaging System (GIMS) that can be used for official or casual use by any Government employee or public user having a valid Mobile No./Email ID.
 - Features:
 - It offers features such as group making, broadcast message, message forwarding and emojis.
 - Although there is **no option to transfer the chat history between two platforms,** the **chats** on **GIMS can be backed up** to a users' email.
 - The **user will have to re-register as a new user** in case they wish to change their registered Email Id or phone number on the App.
 - It allows a user to mark a message as confidential, which will allow the recipient to be made aware the message should not be shared with others.
- Significance:
 - Ensures Secure Communication:
 - The Computer Emergency Response Team (Cert-In) and the Ministry of Home Affairs in April, 2020 had issued an advisory to all government employees to avoid using platforms like Zoom for official communication over safety and privacy concerns.
 - Promoting Indegenous Products:
 - The launch of the App is also a part of the government strategy to push for use of India-made software so as to build an ecosystem of indigenously developed products.
