

Aegean Sea

Key Points

▪ Physical Geography:

- It is an **arm of the Mediterranean Sea**. It is located in the East Mediterranean Basin with the Greek peninsula to its west and Anatolia (consisting of the Asian side of Turkey) to its east.
- The Aegean is connected through the straits of the **Dardanelles**, the **Sea of Marmara**, and the Bosphorus to the **Black Sea**, while the island of **Crete** can be taken as marking its boundary on the south.

▪ Turkey-Greece Dispute:

- The **Aegean Sea maritime dispute** comprises three main issues: the breadth of the territorial sea; the presence of islands; and the delimitation of the continental shelves between the two States.
- Since 1936, Greece has claimed a 6 nautical-mile (nm) territorial sea. Turkey also claims a 6-nm territorial sea in the Aegean. However, the **United Nations Convention on the Law of the Sea 1982 (UNCLOS)** allows States to extend their territorial sea up to 12 nm from the shore.

- Greece has adopted the Convention, but Turkey has not, holding different approaches in different regions.
- **Related Treaty: Treaty of Lausanne** of 1923.
