

# **Export Preparedness Index 2022**

For Prelims: Export Preparedness Index, NITI Aayog, Export Promotion, Research and Development, Global Trade Context.

For Mains: Export Preparedness Index.

#### **Source: PIB**

### Why in News?

Recently, <u>NITI Aayog</u> has released the 3<sup>rd</sup> edition of <u>Export Preparedness Index (EPI)</u> for States/UTs of India for the year 2022.

• The report discusses **India's export performance amid the prevailing global trade** context in FY22, followed by an overview of the country's sector-specific export performance.

### What is the Export Preparedness Index?

#### About:

- EPI is a comprehensive tool which measures the export preparedness of the States and UTs in India.
- Exports are **vital for simulating economic growth** and development in a country, which necessitates understanding the factors which influence export performance.
- The index undertakes a comprehensive analysis of States and UTs across exportrelated parameters in order to identify their strengths and weaknesses.

## Pillars:

- Policy: A comprehensive trade policy providing a strategic direction for exports and imports.
- Business Ecosystem: An efficient business ecosystem helping states attract investments and create an enabling infrastructure for individuals to initiate start-ups.
- Export Ecosystem: Assess the business environment, which is specific to exports.
- Export Performance: This is the only output-based parameter and examines the reach of export footprints of States and UTs.

#### Sub Pillars:

- The index also took into consideration 10 sub-pillars: Export Promotion Policy; Institutional Framework; Business Environment; Infrastructure; Transport Connectivity; Export Infrastructure; Trade Support; R&D Infrastructure; Export Diversification; and Growth Orientation.
- Features: The EPI is a data-driven effort to identify the core areas crucial for export promotion at the sub-national level (states and union territories).
- It explores and highlights India's export potential by examining the different contributions made by each state and union territories.

# What are the Key Highlights of the EPI 2022?

#### Performance of States:

- Top Performers:
  - Tamil Nadu has topped in EPI 2022, followed by Maharashtra and Karnataka.
    - Gujarat, which held the top position in EPI 2021 (released in 2022) has been pushed to the fourth slot in EPI 2022.
  - Tamil Nadu's performance in terms of export performance indicators, including the value of exports, export concentration, and global market footprint, contributed to its top ranking.
    - It has been a consistent leader in sectors such as automotive, leather, textiles, and electronic goods.

#### Hilly/Himalayan States:

• Uttarakhand secured the **top position among hilly/Himalayan states in the EPI 2022.** It is followed by **Himachal Pradesh, Manipur, Tripura,** Sikkim, Nagaland, Meghalaya, Arunachal Pradesh, and Mizoram.

#### Landlocked Regions:

- Haryana topped the **chart among the landlocked regions,** indicating its preparedness for exports.
- It was followed by **Telangana, Uttar Pradesh, Punjab,** Madhya Pradesh, and Rajasthan.

#### Union Territories/Small States:

- Among union territories and small states, Goa ranked first in the EPI 2022.
  - Jammu and Kashmir, Delhi, Andaman and Nicobar Islands, and Ladakh secured the second, third, fourth, and fifth positions, respectively.

### Global Economy:

- Global trade in 2021 showed signs of recovery from the Covid-19. Factors like increased demand for goods, fiscal policies, vaccine distribution, and easing of restrictions contributed to a 27% increase in merchandise trade and a 16% increase in services trade compared to the previous year.
- The Russo-Ukrainian war in February 2022 slowed down the recovery, impacting sectors like grain, oil, and natural gas.
- Trade in goods saw significant growth, and services trade recovered to pre-pandemic levels by Q4 2021.

#### India's Export Trends:

- Despite global slowdown, India's exports in 2021-22 crossed an unprecedented USD 675 Billion, with trade in goods accounting for USD 420 billion.
- The value of merchandise exports crossed USD 400 billion in FY2022, an ambitious goal set by the government, reaching up to **USD 422 billion by March 2022.** 
  - The cause of this performance was manifold. Globally, the increase in prices of commodities and rise in demand from developed countries helped increase India's merchandise exports.

### What are the Key Learnings of the Exports Preparedness Index (EPI)?

- Coastal states have fared the best across all indicators with six out of the top states in the index coming from the coastal region of the country.
  - States like Tamil Nadu, Maharashtra, Karnataka, and Gujarat (all of them performing the best in at least one pillar).
- In terms of strengths, the policy ecosystem is a positive story with multiple states adopting the necessary policy measures to drive exports in their states.
  - At the district-level, 73 % of districts in the country have an export action plan and over 99
     % are covered under the 'One District One Product' scheme.
- States have lagged in terms of transport connectivity. The absence of air connectivity hampers the
  movement of goods across regions, especially in states which are landlocked or geographically
  disadvantaged.
- The lower performance of the country in terms of Research and Development (R&D) indicates the lack of attention given to the role of innovation in exports.
- The state government has to both continue and extend its support to the industries which are struggling.

- 26 states in the country have registered a **decrease in the gross value addition** of their manufacturing sector.
- 10 states have registered a decrease in the inflow of Foreign Direct Investment (FDI).
- The lack of capacity-building workshops for exporters hampers their ability to penetrate the global markets as 25 of 36 states have organized less than 10 workshops across a year.
  - For the effectiveness of existing government schemes to support states, timely approval of projects is a must.

#### What are the Recommendations of the EPI?

- Adoption of Good Practices: States should be encouraged to adopt good practices from their peers if they suit their needs. Learning from successful states can help lagging states improve their export performance.
- Investment in Research and Development (R&D): States should invest in R&D to drive product innovation, market-specific product creation, improvement in product quality, cost reduction, and efficiency improvement.
  - Establishing dedicated research institutes with regular funding can help states improve their exports.
- Leveraging Geographical Indication (GI) Products: States should capitalize on their unique GI products to establish a presence in the global market. Promoting and improving the manufacturing and quality of GI products can boost exports.
  - **For example,** Kancheepuram Silk products can only be exported by Tamil Nadu and have no competition across the country.
- Diversification of Export Markets: Identifying and promoting high-growth sectors, such as information technology, pharmaceuticals, automotive, textiles, and renewable energy, can enhance India's export potential.
