

Credit Suisse Global Wealth Report

Why in News

Recently, Credit Suisse has released the Global Wealth Report 2020.

- Credit Suisse is a financial services company based in Switzerland.
- The Credit Suisse Global Wealth Report provides the most comprehensive and up-to-date coverage of information on household wealth worldwide.

Key Points

- Global Scenario:
 - In 2019, total global wealth rose by USD 36.3 trillion and wealth per adult reached USD 77,309, which is 8.5% more when compared to 2018.
 - As a consequence, the world has been better placed to absorb any losses from <u>Covid-19</u> during 2020.
 - However, total household wealth dropped by USD 17.5 trillion between January and March 2020, a 4.4% decrease compared to the value at the end of 2019.
 - Asia Pacific is the highest contributor of household wealth.
 - Female workers have suffered disproportionately, partly because of their high representation in businesses and industries such as restaurants, hotels, personal service and retail that have been badly affected by the pandemic.
- Indian Scenario:
 - Household wealth in India is dominated by property and other real assets, although financial assets have grown over time, now forming 22% of gross assets.
 - Stocks, bonds, bank deposits are some examples of financial assets.
 - The average wealth of Indian adults rose marginally to USD 17,420 at end-June 2020, as against USD 17,300 as of December 2019, showing some growth despite the Covid pandemic and lockdowns.
 - Wealth inequality remains guite high in India.
 - There is considerable poverty reflected in the fact that 73% of the adult population had wealth below USD 10,000 at the end of 2019.
 - At the other extreme, a small fraction of the population (2.3% of adults) had a net worth over USD 1,00,000.
 - With 4,593 ultra-high-net-worth individuals in the country as of end-2019, India came in fourth after the USA, China and Germany.
 - Between January and April 2020, unemployment rates approximately tripled in India to 24%.

Challenges Related to Wealth Inequality in India

- Distinguishing Poor and Non-poor: In developing countries such as India, despite having hundreds of pro-poor schemes, the biggest question is whether such benefit is reaching the poor.
 - The real challenge is in **distinguishing the poor from non-poor,** particularly when such data are questionable.
- Low Government Spending: The government spending on health, education and social protection in the country is low and more often than not, subsidises the private sector.
- Impact on Women: The burden of inequality continues to be borne by India's women, they continue to be tasked with bearing the burden of care work, thus withholding their entry into the labour force.
- Impact on Vulnerables: While traditionally vulnerable communities, such as the Scheduled Castes and Scheduled Tribes, are catching up with the rest of society in primary education, they are falling further behind when it comes to advanced (12 years or more) education.
 - Most now have access to mobiles but few have computers. And too many people are still
 just one illness away from poverty, as per the UNDP's 2019 Human Development
 Report (HDR).
- Climate change will only exacerbate the inequality.

Way Forward

- Given the damage inflicted by Covid-19 on the global economy, it seems remarkable that household wealth has emerged relatively unscathed. Wealth acts as a form of self-insurance that households can draw upon when times are hard.
- Rising economic inequality has become an important issue for overall development of India with the focus being shifted to <u>'inclusive growth'</u> in the past years.
- By increasing social spending, changing gendered attitudes towards care work, and ensuring the wealthy pay their share, the government can reduce inequalities.
- A focus on rights-based entitlements (for instance, work through the <u>Mahatma Gandhi National Rural Employment Guarantee</u>) and technological innovations (such as to open bank accounts and facilitate digital payments to beneficiaries <u>JAM Trinity</u>) have gone some way towards improving living standards. New insurance schemes for universal health coverage (<u>Ayushman Bharat</u>), crop-failure and accidents (<u>Pradhan Mantri Fasal Bima Yojana</u>) reflect a momentum for action to tackle inequality. These measures are absolutely crucial in reaching those left furthest behind.
