

Third Arctic Science Ministerial

Why in News

Recently, India participated in the **3rd Arctic Science Ministerial (ASM)** and shared plans for research and long-term cooperation in the **Arctic Region.**

The first two meetings—ASM1 and ASM2—were held in the USA in 2016 and Germany in 2018, respectively.

Arctic Region

- The Arctic region comprises the Arctic Ocean and parts of countries such as Canada, Denmark (Greenland), Norway, Russia, USA (Alaska), Finland, Sweden and Iceland.
- These countries together form the core of the Arctic Council, an intergovernmental forum.
 HQ: Norway
- HQ: Norway

Key Points

- Third Arctic Science Ministerial Conference:
 - Host Countries: It was jointly organised by Iceland and Japan.
 - It was the first Ministerial meeting being held in Asia (Tokyo in Japan).
 - Objective: It provides opportunities to various stakeholders, including academia, indigenous communities, governments and policymakers, to enhance collective understanding of the Arctic region, emphasize and engage in constant monitoring, and strengthen observations.
 - Theme: 'Knowledge for a Sustainable Arctic'.
- India's Stand:
 - To contribute observing systems in the Arctic, both in-situ and by remote sensing.
 - Would **deploy open ocean mooring in the Arctic** for long-term monitoring of upper ocean variables and marine meteorological parameters.
 - The launch of **NISAR (NASA-ISRO Synthetic Aperture Radar)** satellite mission, in collaboration with the USA, is underway.
 - Contributions to the Sustained Arctic Observational Network (SAON) would continue.

NASA-ISRO Synthetic Aperture Radar

- <u>NISAR</u> will scan the globe every 12 days over the course of its three-year mission of imaging the Earth's land, ice sheets and sea ice to give an unprecedented view of the planet.
- It aims to conduct global measurements of the cause and consequences of land surface changes using advanced radar imaging.

Sustaining Arctic Observing Network

- It is a joint activity of the International Arctic Science Committee (IASC) and the Arctic Council.
 - IASC is a non-governmental, international scientific organization.
- The purpose is to support and strengthen the development of multinational engagement for sustained and coordinated pan-Arctic observing and data sharing systems.
- India's Engagement in the Arctic:
 - India's engagement with the Arctic dates back to **1920** with the **signing of the Svalbard Treaty in Paris.**
 - Since July 2008, India has had a permanent research station in the Arctic called Himadri at NyAlesund, Svalbard Area in Norway.
 - India received the 'Observer' country status in the <u>Arctic Council</u> in 2013 and is one among the 13 countries across the world, including China, to have that position which was again renewed in 2018.
 - It has also deployed a multi-sensor moored observatory called IndARC in the Kongsfjorden fjord since July 2014.
 - The research in the Arctic region from India is coordinated, conducted, and promoted by the **National Centre for Polar and Ocean Research (NCPOR),** Goa, under the Ministry of Earth Sciences, Government of India.
 - Recently, India drafted a <u>new Arctic policy</u> that aims at expanding scientific research, sustainable tourism and exploration of mineral oil and gas in the Arctic region.
- Significance of Arctic Study for India:

- Though none of India's territory directly falls in the Arctic region, it is a crucial area as the Arctic influences atmospheric, oceanographic and biogeochemical cycles of the earth's ecosystem.
- Arctic warming and its ice melt are global concerns as they play a pivotal role in regulating climate, sea levels, and maintaining biodiversity.
- There is **growing evidence of connection between the Arctic and the Indian Ocean** (which modulates the Indian monsoon). Hence, improving the understanding of physical processes and quantifying the impact of **Arctic ice** melt on the **Indian summer monsoon** is very important.

The Vision
