

# **Model Solar Village**

## Why in News?

Every village in Ayodhya with a population of **5,000** will be developed as a **model solar village**, with a goal of installing **50,000 solar homes**.

## **Key Points**

- The <u>PM Solar Home scheme</u> aims to turn Ayodhya into a solar city by equipping 50,000 homes with solar panels.
  - The <u>Model Solar Village</u> scheme will select one village of 5,000 residents from a list of 42 to promote widespread installation of solar panels.
- Each family for 1 kilowatt solar panel will incur a cost of Rs.65,000, with
   Rs.30,000 subsidized by the central government and Rs.15,000 by the state government.
  - Farmers installing solar pumps will receive extra grants under the KUSUM scheme.
- The central government has allocated Rs.1 crore for each Model Solar Village, which will be transferred to the gram panchayat to fund its development.

### What is PM-KUSUM?

### About:

- The PM-KUSUM is a flagship scheme initiated by the Indian government in 2019 with the primary objective of transforming the <u>agricultural sector</u> by promoting the adoption of solar energy solutions.
- It operates on a demand-driven approach. Capacities are allocated based on the demands received from various states and union territories (UTs).
- Through various components and financial support, PM-KUSUM envisions achieving a significant solar power capacity addition of 30.8 GW by March 31, 2026.

#### Objectives of PM-KUSUM:

- Reduce the Farm Sector's Reliance on Diesel: The scheme aims to reduce the
  dependence on diesel for irrigation by encouraging the use of <u>solar-powered pumps</u> and
  other renewable energy sources.
  - It also seeks to increase farmers' income by reducing irrigation costs through the use of solar pumps and enabling them to sell surplus solar power to the grid.
- Water and Energy Security for Farmers: By providing access to solar pumps and promoting solar-based community irrigation projects, the scheme aims to enhance water and energy security for farmers.
- Curbing Environmental Pollution: Through the adoption of clean and renewable solar energy, the scheme aims to mitigate environmental pollution caused by conventional energy sources.

### Components:

- **Component-A:** Setting up of **10,000 MW** of Decentralized Ground/Stilt Mounted Solar Power Plants on barren/fallow/pasture/marshy/ cultivable land of farmers.
- Component-B: Installation of 20 Lakh Stand-alone Solar Pumps in off-grid areas.
- **Component-C:** Solarisation of 15 Lakh Grid Connected Agriculture Pumps through Individual Pump Solarisation and Feeder Level Solarisation.
