RBI to Launch Unified Lending Interface

Source: TH

Why in News?

The **Reserve Bank of India (RBI)** plans to launch the **Unified Lending Interface (ULI)** at **national level** to transform **India's lending sector**. The ULI was launched as a **pilot project** by the RBI in **2023**.

What is Unified Lending Interface (ULI)?

- About: ULI is a digital platform that is expected to make the lending process easy.
 - It would enable friction-less credit while delivering banking services to farmers and <u>MSME borrowers</u>.
- Key Features of ULI:
 - Consent-Based Digital Access: ULI will provide lenders with digital access to both financial and non-financial data of customers, including <u>land records</u>, through a consent-based system.
 - Common and Standardised APIs: ULI will feature standardised Application Programming Interface (APIs) that allow for a <u>'plug and play' approach</u>, simplifying data access and reducing technical integration complexity.
 - The 'plug and play' concept refers to ready-made facilities with essential infrastructure like power, network etc allowing industries to start operations immediately.

Potential Benefits:

- Frictionless Credit: ULI aims to facilitate a smoother lending experience by minimising paperwork, particularly for smaller and rural borrowers.
- Reduced Appraisal Time: By consolidating data from various sources, ULI will minimise the time required for credit evaluation.
- **Centralised Data Access**: The platform will **consolidate** financial and non-financial data from multiple sources, making it easily accessible to lenders.
- Focus on Agriculture and MSMEs: ULI is expected to address the large unmet demand for credit in sectors such as agriculture and <u>Micro, Small, and Medium Enterprises</u> (<u>MSMEs</u>).
- Relation to Other Digital Initiatives:
 - JAM-UPI-ULI: ULI will be part of the <u>'new trinity'</u> of JAM (Jan Dhan, Aadhaar, and Mobile), <u>UPI</u>, and ULI, representing a significant advancement in India's digital infrastructure.
 - **Digital Infrastructure:** The integration of these systems aims to cater to the large unmet demand for credit and enhance <u>financial inclusion</u>.

What are the Other Platforms that Facilitate Lending in india?

- Public Credit Registry (PCR): <u>PCR</u> is a central database that stores comprehensive credit information of borrowers to help lenders assess creditworthiness and reduce information asymmetry in the credit market.
- Account Aggregator (AA) Framework: <u>AA Framework</u> is a consent-based RBI-regulated platform that enables customers to share their financial information across institutions,

streamlining access for lenders and facilitating quicker, informed lending decisions.

- Credit Information Companies (CICs): Companies like CIBIL, Equifax, Experian etc collect and maintain credit information of individuals and businesses.
- Trade Receivables Discounting System (TReDS): <u>TReDS</u> is an electronic platform that allows MSMEs to auction their trade receivables at competitive rates.
- Peer-to-Peer (P2P) Lending Platforms: Online platforms like Faircent and Lendbox allow individuals to lend and borrow money directly from each other.

UPSC Civil Services Examination Previous Year Question (PYQ)

<u>Prelims</u>
