

BharatNet Project

Why in News

Recently, the Union Cabinet approved a **Viability Gap Funding** support of up to Rs. 19,041 crore (Out of the total expense of Rs. 29,430 crore) for the implementation of the **BharatNet project through Public-Private Partnership** model.

- <u>Public-Private Partnership (PPP)</u> involves collaboration between a government agency and a private-sector company that can be used to finance, build, and operate projects. The PPP Model in this critical infrastructure of Telecom is a novel initiative.
- Viability Gap Funding (VGF) means a grant one-time or deferred, provided to support infrastructure projects that are economically justified but fall short of financial viability.

Key Points

- About:
 - It is the world's largest rural broadband connectivity programme using Optical fibre.
 And also a flagship mission implemented by <u>Bharat Broadband Network Ltd. (BBNL).</u>

Vision

- BBNL is a **Special Purpose Vehicle (SPV)** set up by the Government of India under the **Companies Act, 1956** with an authorized capital of Rs 1000 crore.
- It is a highly scalable network infrastructure accessible on a non-discriminatory basis, to provide on demand, affordable broadband connectivity of 2 Mbps to 20 Mbps for all households and on demand capacity to all institutions, to realise the vision of <u>Digital India</u>, in partnership with States and the private sector.
- It is being implemented by the **Department of Telecommunication under the Ministry of Communications**.
- National Optical Fibre Network (NOFN) which was launched in October 2011 was renamed as Bharat Net Project in 2015.
 - NOFN was envisaged as an information superhighway through the creation
 of a robust middle-mile infrastructure for reaching broadband connectivity to
 Gram Panchayats.
- In 2019, the Ministry of Communications also launched the <u>'National Broadband</u>
 <u>Mission'</u> to facilitate universal and equitable access to broadband services across the country.
- Funding:
 - The entire project is being funded by **Universal service Obligation Fund (USOF)**, which was set up for improving telecom services in rural and remote areas of the country.
- Objective:
 - The objective is to facilitate the delivery of e-governance, e-health, e-education, e-banking, Internet and other services to rural India.
- Phases of the Project:

First Phase:

• Provide one lakh gram panchayats with broadband connectivity by laying underground **Optic Fibre Cable (OFC) lines by December 2017.**

Second Phase:

 Provide connectivity to all the gram panchayats in the country using an optimal mix of underground fibre, fibre over power lines, radio and satellite media by March 2019.

• Third Phase:

 From 2019 to 2023, a state-of-the-art, future-proof network, including fibre between districts and blocks, with ring topology to provide redundancy would be created.

Current Extension of BharatNet:

- The project will be extended to all inhabited villages beyond the gram panchayats in 16 States which are:
 - Kerala, Karnataka, Rajasthan, Himachal Pradesh, Punjab, Haryana, Uttar Pradesh, Madhya Pradesh, West Bengal, Assam, Meghalaya, Manipur, Mizoram, Tripura, Nagaland and Arunachal Pradesh.
- The revised strategy will include creation, upgrading, operation, maintenance and utilisation of BharatNet by the private sector partner, who will be selected by a competitive international bidding process.
- The selected private sector partner is expected to provide reliable, high speed broadband services as per predefined Services Level Agreement (SLA).
- Significance of PPP in BharatNet:
 - Faster Roll Out:
 - The PPP Model will leverage private sector efficiency for operation, maintenance, utilisation and revenue generation and is expected to result in the faster roll out of BharatNet.
 - Increased Investment:
 - The private sector partner is expected to bring an equity investment and raise resources towards capital expenditure and for operation and maintenance of the network.
 - Better Access:
 - Extension of BharatNet to all inhabited villages will enable better access to eservices offered by various governments, enable online education, telemedicine, skill development, e-commerce and other applications of broadband.
