Purple Revolution

Why in News?

The <u>Lavender cultivation</u> success in Jammu and Kashmir exemplifies the powerful collaboration between research institutions, industry, and <u>youth entrepreneurship</u>, offering a path to <u>boost farmers' income</u> and enhance the <u>rural economy</u>.

Key Points

- Aroma Mission and Lavender Cultivation:
 - <u>Council of Scientific and Industrial Research (CSIR)</u> launched the Jammu and Kashmir <u>Aroma Arogya Gram (JAAG)</u> project to promote alternative crops like <u>medicinal and</u> <u>aromatic plants (MAPs).</u>
 - The <u>Aroma Mission</u> introduced lavender cultivation to boost farmers' income and create employment.
 - Farmers received free planting material, training, and support in cultivation, processing, and marketing.
 - Originating in Bhaderwah, Doda, lavender cultivation has spread to other J&K districts and states like Uttarakhand, Himachal Pradesh, Arunachal Pradesh, and Nagaland.

Economic Impact:

- Over 1,300 hectares in J&K are under lavender cultivation, with significant progress in districts like Udhampur, Poonch, and Rajouri.
- Lavender farms have gained national recognition and **boosted tourism**, as seen in the <u>Republic Day tableau at Kartavya Path</u>.
- In 2024, **Doda district extracted 100 kg of lavender oil** and harvested 10 quintals of dry flowers, generating significant revenue for farmers.
- Agricultural Challenges in J&K:
 - Agriculture employs 65% of the population and contributes 27% to J&K's economy.
 - The region faced challenges like difficult terrain, monkey menace, and poor accessibility, limiting land utilization for traditional crops (rice, maize, wheat, pulses).
- Future Prospects:
 - Lavender farming opens opportunities in **value-added medicinal and cosmetic** products.
 - The initiative is a <u>model for rural entrepreneurship</u>, fostering growth in India's path to becoming a developed nation.

Purple Revolution

- Purple revolution is also known as Lavender Revolution and aims to promote the indigenous aromatic crop-based <u>agro-economy</u> by shifting from foreign aromatics to homegrown kinds.
- First-time producers were offered free lavender seedlings as part of the goal, and those who had previously produced lavender were paid Rs. 5-6 per plant.
- The <u>CSIR-Aroma Indian Institute of Integrative Medicine</u> (IIIM)'s Initiative has begun lavender cultivation in the **Ramban district of Jammu and Kashmir.**
- Lavender farming is done in nearly all of Jammu and Kashmir's 20 districts.

 Particularly, the districts of Kathua, Udhampur, Doda, Kishtwar, Rajouri, Srinagar, Bandipora, Budgam, Ganderbal, Anantnag, Kulgam, Baramulla etc. have made huge progress in this direction.

Lavender Cultivation:

- $\circ\,$ Native to Europe, lavender was introduced in the temperate regions of Jammu & Kashmir by the CSIR Aroma Mission.
- It is a small, perennial aromatic herb shrub used in fragrance, specialty food, and alternative medicine industries.

• Propagation Methods:

- Seeds
- Rooted cuttings
- Tissue culture
- Layering
- Soil:
 - Grows well in light, well-aerated soil rich in organic matter.
 - Thrives in neutral to alkaline soil that is free-draining.
 - Sensitive to waterlogging but can grow in poor or eroded soil.
- Rainfall:
 - Performs well with an annual rainfall range between 300 to 1400 mm.

the Vision

- Climate:
 - A hardy temperate plant, tolerant to drought and frost.
 - Prefers cool winters and cool summers with ample sunlight.
 - Can be cultivated in areas with snowfall and hilly terrain.

• Applications:

- Food and flavouring
- Pharmaceutical and therapeutic uses
- Cosmetic products
- Industrial purposes
