### Why in News?

**Tantalum**, a rare metal with remarkable properties, has been discovered in the sands of the [Sutlej River in Punjab](#) by a team of researchers from the Indian Institute of Technology (IIT), Ropar.

### What are the Key Facts About Tantalum?

- **Discovery:**
  - Tantalum is a rare metal with the **atomic number 73**. It was first discovered in 1802 by Swedish chemist **Anders Gustaf Ekenberg**.

### ▪ **Properties:**

- It is **grey, heavy, and highly corrosion-resistant**, forming an oxide layer when exposed to air.
- **Pure tantalum is ductile**, allowing it to be stretched into **thin wires without breaking**.
- Extremely **resistant to chemical attack** at temperatures below 150°C, it is affected only by hydrofluoric acid, acidic solutions with fluoride ions, and free sulphur trioxide.
- Tantalum also has an **extremely high melting point**.

### ▪ **Uses of Tantalum:**

#### ◦ **Electronic Sector:**

- **Capacitors** made from tantalum are vital for storing more electricity in smaller sizes, ideal for portable electronic devices.
- A committee of experts within the Ministry of Mines has recognized a collection of 30 **critical minerals for India, with Tantalum** being among them.
- It is also used to make components for chemical plants, nuclear power plants, aeroplanes and missiles.

#### ◦ **Substitute for Platinum:**

- It has a high melting point, and is frequently used as a **substitute for platinum**, which is more expensive.

#### ◦ **Medical Applications:**

- Tantalum **does not react with bodily fluids** and is used to make surgical equipment and implants, like artificial joints, according to the US Department of Energy.

#### ◦ **Cutting-Edge Material:**

- Composite with **tantalum carbide (TaC)** and **graphite** is one of the hardest materials, used in high-speed machine tool cutting edges.

## **What is the Significance of the Discovery of Tantalum in Sutelej?**

- The discovery of tantalum in the Sutelej River sand indicates that there may be a potential source of tantalum in India, which could **reduce the dependence on imports and increase the domestic supply**.
  - India imports most of its Tantalum metal from the United States, United Kingdom and Germany.
- The discovery of tantalum can help in enhancing **India's electronics and semiconductor Industry.**
