

PM E-DRIVE Excludes Electric Cars

Source: IE

Why in News?

The PM Electric Drive Revolution in Innovative Vehicle Enhancement (PM E-DRIVE) Scheme excludes electric cars from any direct subsidies.

■ The government believes other measures, such as **lower GST** for electric cars are **adequate** to support the sector.

What is the PM E-DRIVE Scheme?

- About PM E-DRIVE Scheme: It is aimed at promoting <u>electric mobility</u> in India having a financial outlay of Rs 10,900 crore over two years.
 - It has been launched to replace FAME II.
- Scope: It offers fiscal incentives to around 25 lakh electric two-wheelers, 3 lakh electric three-wheelers, and 14,000 electric buses through demand incentives.
 - Automakers can claim reimbursements for eligible electric vehicle (EV) sales, similar to the previous FAME-II scheme.
 - However, electric cars are notably excluded from the subsidy.
- Other Provisions: Installation of Electric vehicle public charging stations (EVPCS) in selected cities and on selected highways.
 - Test agencies to be modernised to deal with the new and emerging technologies to promote green mobility.

What was the FAME Scheme?

- The FAME (Faster Adoption and Manufacturing of Hybrid and Electric Vehicles) policy aimed to reduce vehicular emissions, decrease fuel consumption, and encourage sustainable transportation.
 - It was introduced in 2015 under the National Electric Mobility Mission Plan (NEMMP).
- Key Phases:
 - **FAME I (2015-2019):** Focused on providing incentives for the **purchase of electric and hybrid vehicles** and supported the development of **charging infrastructure.**
 - It aimed to promote **cleaner mobility** in public and private sectors.
 - **FAME II (2019-2024):** Expanded the scope, providing USD 1.19 billion to encourage the adoption of electric vehicles, particularly in **public transport (e-buses, 2-wheelers, and 3-wheelers).**
 - It also emphasised building a robust charging infrastructure and targeted reducing emissions from commercial fleets.

What are Key Facts About Promotion of Electric Cars?

- Impact of Exclusion of Electric Cars in PM E-DRIVE: The absence of fiscal incentives following the end of FAME-II has led to a decline in electric car sales.
 - Between April and August 2024, registrations of electric cars dropped by 9% compared to the preceding months when FAME-II was active.
- Inadequate Charging Infrastructure: According to the <u>Bureau of Energy Efficiency</u>, India has approximately 25,000 public charging stations for its 46 lakh registered EVs.
 - The current ratio of **184 EVs per charging station** is much higher than in other countries actively promoting e-mobility.
- Supporting Measures Beyond Subsidies:
 - Production Linked Incentive (PLI) Schemes: The government is supporting the EV sector through <u>PLI schemes</u> for auto components and <u>advanced cell chemistry (ACC)</u> <u>batteries.</u>
 - These incentives could help lower production costs by fostering economies of scale, especially in the EV supply chain.
 - Lower GST and State-Level Exemptions: Electric cars continue to benefit from a lower Goods and Services Tax (GST) rate of 5%, compared to 28% on hybrid and CNG vehicles, and 49% on internal combustion engine vehicles.
