

Development Finance Institution to Fund Infrastructure

The government has proposed to set up a **development financial institution (DFI)** to solve the **infrastructure financing needs** of the country.

- The establishment of such an institution is considered as a positive step as banks do not have the long-term funds to finance such projects.
- Banks cannot afford to lend for such projects because that would shrink their lending capacity as the funds get locked up in such projects for that time period.
- Why India needs DFIs to Fund Infrastructure?
 - To boost <u>economic growth</u> which would increase capital flows and energise capital markets.
 - To improve long term finances.
 - To provide credit enhancement for infrastructure and housing projects
 - As India does not have a development bank, DFI would fulfil the need for us to have an institutional mechanism.
 - Debt flow towards infrastructure projects would be improved.
- The <u>RBI</u> had also specified in 2017 that specialised banks could cater to the wholesale and longterm financing needs of the growing economy and possibly fill the gap in long-term financing.

Thus, it would be wise to revive the concept of DFI if the government wishes to keep societal, cultural, regional, rural and environmental concerns intact.

What is Development Finance Institution?

- These are specialized institutions set up primarily to provide development/ Project finance especially in developing countries.
- These DFIs are usually majority-owned by national governments.
- The source of <u>capital of these banks</u> is national or international development funds.
- This ensures their creditworthiness and their ability to provide project finance in a very competitive rate.

How is it different from commercial banks?

- It strikes a balance between commercial operational norms as followed by commercial banks on the one hand, and developmental responsibilities on the other.
- DFIs are not just plain lenders like commercial banks but they act as companions in the development of significant sectors of the economy.

Evolution of DFIs in India:

- The first DFI was the Industrial Financial Corporation of India (IFC) that was launched in 1948.
- IDBI, UTI, NABARD, EXIM Bank, SIDBI, NHB, IIFCL etc are the other major DFIs.
- · Later several of them were converted into banks as industry like ICICI Bank, IDBI Bank etc.

Classification of development Financial Institutions:

 Sector specific financial institutions: These financial Institutions focusses on a particular sector to provide project finance. Ex: NHB is solely related to Housing projects,

- EXIM bank is oriented towards import export operations.
- <u>Investment Institutions</u>: These are specialized in providing services designed to facilitate business operations, such as capital expenditure financing and equity offerings, including initial public offerings (IPOs).Ex: LIC, GIC and UTI
