

National Judicial Data Grid

Source: PIB

Why in News?

Recently, the **National Judicial Data Grid (NJDG)** has gained significant attention for its role in revolutionizing the way judicial proceedings are managed in India.

What is the National Judicial Data Grid?

About:

- NJDG is a database of orders, judgments and case details of 18,735 District & Subordinate
 Courts and High Courts created as an online platform under the eCourts Project.
- Data is updated on a near real-time basis by the connected District and Taluka courts. It provides data relating to judicial proceedings/decisions of all computerized district and subordinate courts of the country.
- All High Courts have also joined the NJDG through web services, providing easy access facility to the litigant public.

Features:

- Aligned with the <u>National Data Sharing and Accessibility Policy (NDSAP)</u>, NJDG provides an Open <u>Application Programming Interface (API)</u> to Central & State Governments.
- This API offers streamlined access to NJDG data using designated departmental IDs and access keys.
- This feature is intended for **institutional litigants to evaluate and monitor cases**, with plans to extend access to non-institutional litigants in the future.

Significance:

- NJDG works as a monitoring tool to identify, manage & reduce pendency of cases.
- It helps to provide timely inputs for making policy decisions to reduce delays in disposing of cases and helps in reducing case pendency.
- It also facilitates better monitoring of court performance and systemic bottlenecks, and, thus, serves as an efficient resource management tool.
- To track cases related to land disputes, Land Records data of 26 States have been linked with NJDG.

International Recognition:

- In the Ease of Doing Business report for 2018, the World Bank (WB) commended NJDG for its role in generating case management reports that facilitate contract enforcement.
- This recognition underscores NJDG's significance in improving the business environment.

What are the Other Initiatives under E-court Projects?

- Case Information Software (CIS)
- Virtual Courts
- Video-conferencing (VC).
- National Service and Tracking of Electronic Processes (NSTEP)
