

Syndicated Loan

Source: TH

Recently, a private **Non-Banking Financial Company (NBFC)** announced that it has raised USD 425 million and EURO 40 million through a syndicated loan.

- It is a three-year external commercial borrowing facility structured as a social loan that would be used to empower small entrepreneurs and <u>vulnerable groups</u> across India.
- A syndicated loan is financing offered by a syndicate made up of a group of lenders that work together to provide funds for a borrower.
 - The borrower can be a corporation, a large project, or a sovereign government.
 - Syndicated loans involve large amounts of money, spreading the risk among several financial institutions to reduce the impact if the borrower fails to repay.
- External Commercial Borrowings (ECBs) denote Indian companies borrowing funds from foreign sources, such as loans, bonds, or financial instruments, to finance business expansion, asset acquisition, or existing debt repayment.
