## What are the Threats and Conservation Efforts Related to Greater Adjutant Storks?

### ▪ Threats:

- **Habitat Loss:** Urbanization is destroying wetlands, which are essential for these storks to forage for food. Many are now forced to rely on garbage dumps, which is not a healthy long-term solution.
  - Eg: Garbage dumping site near the [Deepor Beel Wildlife Sanctuary \(Ramsar site\)](#).
- **Encroachment and drainage projects** are destroying crucial wetland ecosystems.
  - For example, In Guwahati, private landowners are **cutting down roosting trees (which they need for nesting)**, further squeezing their habitat.
- **Seasonal Challenges:** The **breeding season (October-February)** coincides with **abundant fish** and prey availability in wetlands.
  - During the non-breeding season, these **storks rely on urban waste disposal sites** for food.
- **Human Disturbance:** **Local communities often drive the birds away due to the strong odor of their droppings and the presence of rotting meat brought to feed their hatchlings.**

### ▪ Conservation Efforts:

- **Working with the Locals:** In Assam, local communities play a significant **role in the conservation of Hargila**. Conservationists have engaged villagers, particularly women, in protecting **nesting sites and raising awareness** about the importance of these birds.
- **Protection of Nesting Sites:** Efforts have been made to **protect and restore nesting sites by planting trees and safeguarding existing** ones where the storks nest. Community-based organizations are working to monitor and protect these sites from disturbances.
- **Awareness Campaigns:** Educational programs and awareness campaigns are being

conducted to change public perception and encourage coexistence with these storks.

## UPSC Civil Services Examination Previous Year Question (PYQ)

### **Prelims**

**Q. 'Invasive Species Specialist Group' (that develops Global Invasive Species Database) belongs to which one of the following organizations?(2023)**

- (a) The International Union for Conservation of Nature
- (b) The United Nations Environment Programme
- (c) The United Nations World Commission for Environment and Development
- (d) The World Wide Fund for Nature

**Ans: (a)**

**Q. Other than poaching, what are the possible reasons for the decline in the population of Ganges River Dolphins? (2014)**

1. Construction of dams and barrages on rivers
2. Increase in the population of crocodiles in rivers
3. Getting trapped in fishing nets accidentally
4. Use of synthetic fertilizers and other agricultural chemicals in crop-fields in the vicinity of rivers.

**Select the correct answer using the code given below:**

- (a) 1 and 2 only
- (b) 2 and 3 only
- (c) 1, 3 and 4 only
- (d) 1, 2, 3 and 4

**Ans: (c)**
