

# **Linking Credit Cards With UPI**

For Prelims: UPI, Financial Instrument, Digital Payment, RBI

For Mains: Linking Credit Cards With UPI, its Significance and Challenges, Government Policies &

Interventions

#### Why in News?

The <u>Reserve Bank of India (RBI)</u> has proposed to allow <u>linking of credit cards with the Unified Payments Interface (UPI) platform.</u>

- A credit card is a <u>financial instrument</u> issued by banks with a pre-set credit limit, help make cashless transactions. It enables cardholders to pay a merchant for goods and services based on her accrued debt.
- This is intended to provide additional convenience to users and enhance the scope of <u>Digital Payments.</u>

# What is Unified Payment Interface?

- About:
  - It is an advanced version of <u>Immediate Payment Service (IMPS)</u>- round-the-clock funds transfer service to make cashless payments faster, easier and smoother.
  - UPI is a system that powers multiple bank accounts into a single mobile application (of any participating bank), merging several banking features, seamless fund routing & merchant payments into one hood.
  - UPI is currently the biggest among the <u>National Payments Corporation of India (NPCI)</u> <u>operated systems</u> including <u>National Automated Clearing House (NACH)</u>, Immediate Payment Service (IMPS), <u>Aadhaar enabled Payment System (AePS)</u>, <u>Bharat Bill</u> <u>Payment System (BBPS)</u>, <u>RuPay</u> etc.
- Need to Link Credit Card with UPI:
  - The UPI has, over time, become a popular mode of payment in India with more than 26 crore unique users and five crore merchants on the platform.
  - In May 2022, about 594 crore transactions amounting to Rs 10.4 lakh crore were processed through the interface.
  - At present, the **UPI facilitates transactions by linking savings/current accounts through users' debit cards.**

## What is the Significance of the Move?

- Additional Avenue for Payment:
  - The arrangement is expected to provide an additional avenue for payment to

customers and hence enhance convenience.

- Credit Card Usage will Increase:
  - It will deepen the reach and usage of credit cards.
  - It is anticipated that credit card usage will be zooming up in India given UPI's widespread adoption.
- Avenues to build Credit on UPI:
  - It opens up avenues to build credit on UPI through credit cards in India, where in the last few years, a number of <u>startups</u> like Slice, Uni, One etc. have emerged.
- Bolster Transactions at more Merchant Sites:
  - It is expected to bolster transactions and acceptance at more merchant sites.
  - People who generally prefer to pay by credit card so as to avail of a longer pay-back period or loans on credit-card outstanding, or who do not wish to touch their savings at the moment of purchase, can pay using credit cards via UPI.
- Boost Overall Spending:
  - The move will provide a significant boost to overall spending via credit cards —
    currently, spending through the use of credit cards is more than double the average spend
    via debit cards. More spending is generally a force multiplier for the economy.
- Increase Average Ticket Size of Financial Transactions:
  - Besides accelerating digital transactions this measure is also expected to affect the average ticket size of financial transactions.
    - Currently the average ticket size per transaction is Rs 1,600 while it is Rs 4,000 in credit cards.
  - So, with the new development the UPI transaction ticket size is likely to go up to somewhere around Rs 3,000 to Rs 4,000, analysts claim.

### What are the Challenges?

- It is not clear how the <u>Merchant Discount Rate (MDR)</u> will be applied to UPI transactions done through credit cards.
  - The MDR is a fee that a merchant is charged by their issuing bank for accepting payments from their customers via credit and debit cards.
- According to a norm that has been in effect since January 2020, UPI and RuPay attract zero-MDR, meaning that no charges are applied to these transactions.
- Applicability of zero-MDR on UPI could also be a reason why other card networks such as Visa and Mastercard may not have been onboarded to UPI for credit cards yet.
