

Bomb Cyclone

Why in News?

Recently, a [Bomb cyclone](#) hit the **United States and Canada**, which triggered [road accidents](#) that results in the death of more than 30 people.

What is a Bomb Cyclone?

- **About:**
 - A bomb cyclone is a **large, intense midlatitude storm that has low pressure at its center**, weather fronts and an array of associated weather, from blizzards to severe thunderstorms to heavy precipitation.
 - Bomb cyclones put forecasters on high alert because **they can produce significant harmful impacts**.
- **Reasons for the Formation:**
 - Storms **form when a mass of low-pressure air (warm air mass) meets a high-pressure mass (cold air mass)**. The air flows from high pressure to low, creating winds.
 - It occurs when a midlatitude cyclone rapidly intensifies, **dropping at least 24 millibars over 24 hours**.
 - **A millibar measures atmospheric pressure.**
 - This quickly increases the pressure difference, or gradient, **between the two air masses, therefore making the winds stronger**.
 - The formation of this rapidly strengthening weather system is a process **called bombogenesis**.

How does a Bomb Cyclone Differ from a Hurricane?

- [Hurricanes](#) **tend to form in tropical areas** and are powered by warm seas. For this reason, they're **most common in summer or early fall**, when seawater is warmest.
- Bomb cyclones **generally occur during colder months** because cyclones occur due to cold and warm air meeting.
 - During the summer, there's generally not much cold air across the atmosphere; this means a bomb cyclone is much less likely to occur.
- Hurricanes **form in tropical waters**, while **bomb cyclones form over the northwestern Atlantic**, northwestern Pacific and sometimes the [Mediterranean Sea](#).

UPSC Civil Services Examination Previous Year Questions (PYQs)

Consider the following statements: (2020)

1. Jet streams occur in the Northern Hemisphere only.
2. Only some cyclones develop an eye.
3. The temperature inside the eye of a cyclone is nearly 10°C lesser than that of the surroundings.

Which of the statements given above is/are correct?

- (a)** 1 only
- (b)** 2 and 3 only
- (c)** 2 only
- (d)** 1 and 3 only

Ans: (c)
