

Impact of PMUY in Jammu and Kashmir | Jammu & Kashmir | 14 Nov 2024

Why in News?

A study was conducted to assess the impact of <u>Pradhan Mantri Ujjwala Yojana (PMUY)</u> in Jammu and Kashmir.

Under the scheme the government has distributed 10.3 crore <u>Liquified Petroleum Gas</u>
connections.

Key Points

- Methodology and Aim of the Study:
 - The study collected primary data from 820 households across 48 villages in Kulgam and Rajouri, two relatively disadvantaged districts in J&K.
 - This study investigates the PMUY's impact on clean cooking fuel adoption in the districts, focusing on socio-economic and health outcomes, barriers to exclusive LPG use, and the role of awareness.
 - The sample includes representation from various economic groups:
 - Above Poverty Line (APL), Below Poverty Line (BPL), and Antyodaya Anna Yojana (AAY) households.
- Findings of the Study:
 - LPG Connection Adoption:
 - In rural J&K, 85.07% of households have official LPG connections, with **68% of these obtained through the PMUY.**
 - Only 4.41% of rural households, primarily in hilly areas like Rajouri, lack access to LPG, while 10.53% rely on unofficial connections.
 - Despite increased LPG availability, <u>traditional cooking methods</u> remain common:
 - 92% of households still use traditional chulhas, and 85% engage in fuel stacking by using both solid fuels and LPG.
 - Health Benefits for PMUY Beneficiaries:
 - PMUY adoption has led to **significant health improvements for women**, by reducing exposure to smoke from traditional fuels.
 - Among BPL households, respiratory issues were reduced.
 - AAY households also saw reduced health issues from 13% among nonbeneficiaries to 10% for beneficiaries.
 - Barriers to Exclusive LPG Usage:
 - Lack of awareness remains a barrier, with 47% of households unaware of solid fuel health risks.
 - The cost of LPG refills is prohibitive for many, leading to fuel stackin g with cheaper solid fuels.
 - Fuel stacking remains common in 85% of households, highlighting the need for additional financial support.
 - Recommendations:
 - Expanding the **LPG distribution network in rural areas** and providing additional financial support for refills can further promote clean fuel adoption and reduce reliance on solid fuels.

Pradhan Mantri Ujjwala Yojana (PMUY)

About:

- The Ministry of Petroleum and Natural Gas, introduced the 'Pradhan Mantri Ujjwala Yojana' (PMUY) as a flagship scheme with the objective of making clean cooking fuel such as LPG available to the rural and deprived households which were otherwise using traditional cooking fuels such as firewood, coal, cow-dung cakes etc.
 - Usage of traditional cooking fuels had detrimental impacts on the health of rural women as well as on the environment.

Objectives:

- Empowering women and protecting their health.
- Reducing the number of deaths in India due to unclean cooking fuel.
- Preventing young children from a significant number of acute respiratory illnesses caused due to indoor air pollution by burning fossil fuel.

Features:

- The scheme provides a financial support of Rs 1600 for each LPG connection to the BPL households.
- Along with a deposit-free LPG connection, <u>Ujjwala 2.0</u> will provide the first refill and a Stove, free of cost to the beneficiaries.

Earthquake in Jammu and Kashmir | Jammu & Kashmir | 14 Nov 2024

Why in News?

Recently, an <u>earthquake</u> with a magnitude of 5.2 struck Jammu and Kashmir, but **no loss of life or damage to property was reported.**

 The earthquake originated in the Afghanistan region, with its tremors reaching the Kashmir Valley.

Key Points

- An earthquake is a natural phenomenon characterised by a sudden shaking of the ground caused by the passage of seismic waves through Earth's rocks.
- The vibrations called seismic waves are generated from earthquakes that travel through the Earth and are recorded on instruments called seismographs.
 - The location below the earth's surface where the earthquake starts is called the hypocenter, and the location directly above it on the surface of the earth is called the epicenter.

//

EARTHQUAKE ABOUT

Shaking of the earth; caused due to release of energy, generating seismic waves in all directions

EARTHQUAKE WAVES

- Body Waves: Move in all directions travelling through the body of the earth
 - OP Waves: Move faster, First to arrive at surface, Similar to sound waves, Travel through gaseous, liquid and solid materials
 - S Waves: Arrive at surface with some time lag, Travel only through solid materials
 - Surface Waves: Last to report on seismographs, More destructive, Cause displacement of rocks
 - Love Waves: Same motion as S-waves (horizontal) without vertical displacement, Sideways motion perpendicular to the direction of propagation, Faster than Rayleigh waves
 - Rayleigh Waves: Cause the ground to shake in an elliptical pattern, Spread out the most of all seismic waves, Move vertically and horizontally in a vertical plane

HYPOCENTER

Location where the earthquake starts (below earth's surface)

EPICENTER

Location right above the Hypocenter (on the earth's surface)

CAUSES OF EARTHQUAKES

- Release of energy along a Fault/Fault Zones (break in the crustal rocks)
- Movement of tectonic plates (most common)
- Volcanic eruption (stress changes in rockinjection/withdrawal of magma)
- A Human activities (mining, explosion of chemical/nuclear devices etc.)

MEASURING EARTHQUAKE

- Seismometers Measures seismic waves
- Richter Scale Measures magnitude (energy released; range: 0-10)
- Mercalli Measures intensity (visible damage; range: 1-12)

DISTRIBUTION

- Circum-Pacific Belt 81% of earthquakes
- Alpide Earthquake Belt 17% of the largest earthquakes
- Mid-Atlantic Ridge Mostly submerged underwater

EARTHQUAKE IN INDIA

- India is one of the highly earthquake affected countries due to the presence of technically active mountains - the Himalayas.
- India has been divided into 4 seismic zones (II, III, IV, and V)
