

Decline in Maternal Mortality Ratio

Why in News

Recently, the Office of the Registrar General's Sample Registration System (SRS) has released a special bulletin on Maternal Mortality in India 2016-18.

As per the <u>World Health Organization</u>, maternal death is the death of a woman while pregnant or within 42 days of termination of pregnancy, from any cause related to or aggravated by the pregnancy or its management.

The Office of the Registrar General

- It is under the **Ministry of Home Affairs.**
- Apart from conducting the Population <u>Census</u> and monitoring the implementation of the Registration of Births and Deaths in the country, it has been giving estimates on fertility and mortality using the Sample Registration System (SRS).
- SRS is the largest demographic sample survey in the country that among other indicators
 provide direct estimates of maternal mortality through a nationally representative sample.
- Verbal Autopsy (VA) instruments are administered for the deaths reported under the SRS on a regular basis to yield a cause-specific mortality profile in the country.

Key Points

- Maternal Mortality Ratio of the Country:
 - MMR has declined to 113 in 2016-18 from 122 in 2015-17 and 130 in 2014-2016.
 - MMR is defined as the number of maternal deaths during a given time period per
 1,00,000 live births during the same time period.
 - The target 3.1 of <u>Sustainable Development Goals (SDGs)</u> set by the United Nations aims at reducing the global maternal mortality ratio to less than 70 per 1,00,000 live births.
- MMR of Various States:
 - Assam (215), Uttar Pradesh (197), Madhya Pradesh (173), Rajasthan (164), Chhattisgarh (159), Odisha (150), Bihar (149), and Uttarakhand (99).
 - The southern States registered a lower MMR Karnataka (92), Andhra Pradesh (65), **Tamil Nadu (60), Telangana (63) and Kerala (43).**
- Government Initiatives:
 - Janani Suraksha Yojana under the National Health Mission to link cash assistance to institutional deliveries.
 - The Pradhan Mantri Surakshit Matritva Abhiyan (PMSMA) provides a fixed day for assured, comprehensive and quality antenatal care free of cost to pregnant women on 9th of every month.

• Pradhan Mantri Matru Vandana Yojana and LaQshya Guidelines.

Way Forward

- Maternal mortality in a region is a measure of reproductive health of women in the area.
- The WHO has already appreciated India's efforts in reducing the maternal mortality rate. India needs to give a special focus to states with higher maternal mortality ratio.
