

Kumki Elephants

Source: TH

Recently, Andhra Pradesh (AP) and Karnataka signed an MoU for the deployment of trained elephants (Kumki) from Karnataka to control the elephant menace in AP.

- It Includes deploying an expert team for elephant capture, mahout training programs, knowledge transfer, SOPs for darting (tranquillising) and capturing animals, nutrition and food, and workshops and seminars.
- Karnataka has transferred 62 kumki elephants to Uttar Pradesh, Chhattisgarh, Maharashtra, and other states.
- Kumki:
 - Kumki is a term used in India to refer to trained captive Asian elephants.
 - They can capture, rescue, and treat injured wild elephants, as well as to drive them away from human settlements.
 - Some are **trained to follow commands and aid** in training other elephants.
 - They participate in forest patrolling to support conservation initiatives.
- India is home to about **60**% of the world's Asian elephant population, with an estimated 27,312 individuals as per the 2017 census and 138 identified <u>elephant corridors</u>.
- Elephants have a gestation period of about 22 months, the longest of any land animal.
- Asian elephants (Indian) are classified as Endangered on the <u>IUCN Red List</u>.
