

National Landslide Risk Mitigation Project | Uttarakhand | 29 Nov 2024

Why in News?

Recently, a **High-Level Committee** chaired by the Union Home Minister and Minister of Cooperation has approved Rs 1,115.67 crore for <u>disaster mitigation</u> and **capacity-building projects in various states.**

Key Points

- About the Committee:
 - The committee reviewed proposals to mitigate landslide risks in 15 states under the National Disaster Mitigation Fund (NDMF).
 - It also approved funding from <u>the National Disaster Response Fund (NDRF) f</u>or training and capacity-building initiatives for Civil Defense volunteers across all states and union territories.
- The National Landslide Risk Mitigation Project was approved for 15 states at a total cost of Rs 1,000 crore.
 - State-wise allocations:
 - Uttarakhand: Rs 139 crore
 - Himachal Pradesh: Rs 139 crore
 - Eight North-East States: Rs 378 crore
 - Maharashtra: Rs 100 crore
 - Karnataka: Rs 72 crore
 - Kerala: Rs 72 crore
 - Tamil Nadu: Rs 50 crore
 - West Bengal: Rs 50 crore
- Training and Capacity Building of Civil Defense Volunteers was approved for all states and union territories with a total outlay of Rs 115.67 crore.
- Previous Approvals by the Committee:
 - **Urban Flood Risk Mitigation Projects**: <u>Urban flood</u> risk management projects were approved for seven cities with a total outlay of Rs 3,075.65 crore.
 - **GLOF (Glacial Lake Outburst Flood) Risk Management Projects:** <u>GLOF</u> was approved for four states at a total cost of Rs 150 crore under NDMF.

National Disaster Relief Fund

- National Calamity Contingency Fund (NCCF) was renamed as National Disaster Response Fund (NDRF) with the enactment of <u>the Disaster Management Act</u>, 2005.
 - It is defined in Section 46 of the Disaster Management Act, 2005.
- It is managed by the Central Government to meet the expenses for emergency response, relief and rehabilitation due to any threatening disaster situation or disaster.
 - It supplements the **SDRF** in case of a disaster of a severe nature, provided adequate funds are not available in the SDRF.

Glacial Lake Outburst Flood (GLOF)

 A glacial lake outburst flood (GLOF) is a type of catastrophic flood that occurs when the dam containing a glacial lake fails, releasing a large volume of water. This type of flood is typically caused by rapid melting of glaciers or the buildup of water in the lake due to heavy precipitation or the inflow of meltwater.

TheVision

• In February 2021, <u>Chamoli district in Uttarakhand witnessed flash floods</u> which are **suspected to have been caused by GLOFs.**
